## Game Objective

The objective of Fan Tan is to predict the number of beads remaining in the last line once the selected beads are removed and sorted into lines of four.

Game Rules

During the betting time, a random number of beads is selected from a pile of beads using a cup — only the selected beads participate in the current game round.

After betting time has expired, the selected beads are sorted on the table into lines of four beads in each line.

Bead sorting is performed using a special stick. The final remaining beads (between 1 and 4 beads) are placed in a line in the centre of the table and that number represents the game result.
Game View

Fan Tan can be played in a choice of two views — the default or the advanced game view. The default game view displays the main bet types, while the advanced game view includes more traditional Fan Tan bet types.

- It is possible to switch between the two game views by a simple click/tap on the view switching button. The view switching button changes depending on the selected view mode.

- Switching from the default to advanced game view is possible during any game phase.

- Switching from advanced to the default game view is available only if you have no bets placed or your bets are placed only on the bets spots that are available in a default game view.

Bet Types

You can place different bets on the Fan Tan table, and each type of bet has its own payout. Your bet is returned on top of your winnings. The available bet spots depend on the game view you have selected.

Bet types in the default game view:

A. 1, 2, 3, 4 — place your bet on a single number of remaining beads — 1, 2, 3 or 4. Wins pay 2.85:1.
B. Big/Small — place your bet on the number of remaining beads being Small (1 or 2) or Big (3 or 4). Wins pay 0.95:1.
C. Odd/Even — place your bet on the number of remaining beads being Odd (1 or 3) or Even (2 or 4). Wins pay 0.95:1.

Bet types in the advanced game view:

A. 1, 2, 3, 4 — place your bet on a single number of remaining beads — 1, 2, 3 or 4. Wins pay 2.85:1.
B. Big/Small — place your bet on the number of remaining beads being Small (1 or 2) or Big (3 or 4). Wins pay 0.95:1.
C. Odd/Even — place your bet on the number of remaining beads being Odd (1 or 3) or Even (2 or 4). Wins pay 0.95:1.
D. Nim — place your bet on 2 possible numbers of beads remaining. If the first number displayed on the Nim bet spot is the game result, it counts as a win. Wins pay 1.90:1. If the last number displayed on the Nim bet spot is the game result, it counts as a push and your initial bet is returned.
E. Kwok — place your bet on 2 possible numbers of beads remaining. Numbers on the Kwok bet spots show which 2 numbers will count as winning ones. Wins pay 0.95:1.
F. Ssh — place your bet on 3 possible numbers of beads remaining. Numbers on the Ssh bet spots show which 3 numbers will count as winning ones. Wins pay 0.316667:1.

Payouts

Your payout depends on the type of placed bet. Your bet is returned on top of your winnings.

BIG / SMALL	0.95
KWOK	0.95

The CHIP DISPLAY allows you to select the value of each chip you wish to bet. Only chips of denominations that can be covered by your current balance will be enabled.

Once you have selected a chip, place your bet by simply clicking/tapping the appropriate betting spot on the game table. Each time you click/tap the betting spot, the amount of your bet increases by the value of the selected chip or up to the maximum limit for the type of bet you have selected. Once you have bet the maximum limit, no additional funds will be accepted for that bet, and a message will appear above your bet to notify you that you have bet the maximum.

NOTE: Please do not minimise your browser or open any other tab in your browser while betting time remains, and you have placed bets on the table. Such actions may be interpreted as leaving the game, and your bets will therefore be declined for that particular game round.

The REPEAT button allows you to repeat all bets from the previous game round. This button is available only before the first chip is placed.

Error Handling

If there is an error in the game, system or game procedure, the game round will be temporarily paused while the game host/presenter notifies the service manager. You and other players will be notified via Chat, or by an on-screen pop-up message, that the issue is being investigated. If the manager can immediately resolve the error, the game round will continue as normal. If immediate resolution is not possible, the game round will be cancelled, and initial bets will be refunded to all players who participated in the game round.

More Games

The LOBBY button can be selected at any time from any game.

> LOBBY

It allows you to easily change the game table or select any other live game. You will not be removed from this game until you have actually selected the new game/table you wish to join. You can use the LOBBY to browse other games while still playing in your current game.

Multi-Game Play

If you enjoy non-stop action, you can join more than one game table — then view and play them simultaneously, all in the same browser window!

After you have joined at least one game table, click on LOBBY. In the lobby or game, click the +TABLE button associated with that table to join it. Certain tables may be unavailable for multi-game play and will therefore not display a +TABLE button.

+ TABLE

After you have joined multiple tables, you will be able to resize your browser window as a whole, but you will not be able to resize each game table window separately.

You can exit any table without affecting your presence at other tables you have joined. To exit a table, click the X button.

Please note:

- You will exit a table automatically if you join the same table through a different device/browser.
- If you click directly on a table icon instead of the +TABLE button, you will merely *switch* tables instead of joining the chosen table *in addition* to the table you joined previously.

We kindly advise you to join only as many tables as your screen can accommodate while still allowing you to place bets deliberately and accurately.
