## How do you win?

### Win lines and bonus wins

To win you must match 3 or more reel symbols on a win line, or have 3 Wheel scatter symbols anywhere in view. All line pay symbols must appear on a win line and on consecutive reels beginning with the far left reel. Only the highest win is paid on each win line. Coinciding wins on different win lines are added.

Bonus wins are added to pay line wins. Click the  button to view the win lines.

### Wild symbol

The TV symbol is wild, and substitutes for any symbol except the Wheel scatter symbol.

### Prize Wheel

3 Wheel scatter symbols in view triggers the Prize Wheel Bonus. Drag the wheel clockwise to spin it, or click . The prize that the wheel stops on will be awarded.

### Box Bonus

Box Bonus is triggered when the Prize Wheel stops on a Box Bonus segment. Choose any of the boxes on display. Each box contains either a cash value, a cheque book and pen, or a star. Finding a cheque book and pen ends the bonus - the accumulated total win is awarded. Finding a star takes you to the next round. Finding all 3 stars awards Buzz's Star Prize and ends the bonus.

### Prize Board Bonus

Prize Board is triggered when the Prize Wheel stops on a Prize Board segment. Select any of the squares to reveal a symbol. Finding 3-of-a-kind of any symbol awards a prize and ends the bonus. Finding a star symbol takes you to the Bonus Board. When playing Bonus Board, each star that you find increases your win. Finding 3 "X" symbols ends the bonus.

### Prize Spins

Bonus Prize Spins are awarded when the Prize Wheel stops on a Prize Spins segment. During Prize Spins, the middle reel is replaced by a giant wild symbol which increases the chance of winning lines. The Prize Spins bonus ends when all 5 prize spins have been used.

The outcome for each bonus game is pre-determined at the start of the game. Bonus games are not games of skill.

The prizes are paid in accordance with the payout table available on the game interface.

### **Game recovery**

In the event of a game in real play being interrupted (i.e. started but not completed due to connectivity issues or accidentally closing the browser etc.), any winnings will be correctly credited to your account and will be exact according to the result prior to the game being interrupted. Note that in a recovered game with a bonus feature the location of the bonus awards may be different from where they were prior to game recovery. However, the value of any prize awarded after the game has recovered will be the same. This is because the outcome for each game is pre-determined at the start of the game.

### **Return to player**

This game has an average Return To Player (RTP) of 95.50%.

System malfunction voids all pays and plays.
