

Game Objective

Live Mega Ball is a unique, entertaining, and fast-paced game show, featuring a Mega Ball Bonus round in which you have the chance to win even more with the added multipliers! Buy a packet of cards to play with for the value you have selected and collect lines, while the numbered balls are being randomly drawn by the Ball drawing machine, simply complete lines of numbers on your card(s). It's all about getting as many lines per card as possible – the more lines you get, the more you win!

Game Rules

Mega Ball is played with 1 – 200 cards and a Ball drawing machine. Each 5x5 cell card contains 24 randomly arranged unique numbers with a free square in the centre. The free square is considered as an already marked square. You win if you get a horizontal, vertical, or diagonal line of 5 squares. You can win up to 9 lines per card.

Main Game Round

- Buy a packet of cards you wish to play with for the value you have selected. You can add more card packets after the first packet is bought and change the value of your cards while the betting time is open. Your selected card value will be automatically applied to all your cards.
- Your cards will be visible on the screen regardless of the amount. You can zoom in on an individual card at any time. If you would like to change the numbers on a particular card, simply zoom in on that card and while the betting time is open, click/tap the REFRESH NUMBERS button until you are satisfied with the resulting new numbers.
- Once the betting time is over, 20 out of 51 numbered balls are drawn from the Ball drawing machine. If the number of the drawn ball matches a number in any of your cards, a badge is automatically placed on that number. When a completed line is collected, your winnings per card are also updated automatically and displayed below the corresponding card.

- As the balls are drawn one by one, your cards will be automatically updated and sorted, with the card closest to winning placed at the top.
- To add to the excitement, you can also see on your screen how much you could win if a special ball should happen to be drawn. Expected ball numbers will be highlighted in gold on your cards.
- The drawn balls are also automatically updated and visible on your screen.

Mega Ball Bonus round

- After all 20 balls are drawn in the main game round, one or two intriguing Mega Ball Bonus rounds occur. At the beginning of the Mega Ball Bonus round, a Mega Ball multiplier in the range from 5x to 100x is generated. A physical ball is drawn from the Ball drawing machine to determine the number of the Mega Ball.
- If the Mega Ball number completes any line in your card(s), your payout on that card is multiplied by the Mega Ball multiplier.
- If a line is not complete, the Mega Ball number will be treated as a regular ball and will not multiply the payout.
- If there is more than one Mega Ball among your winning lines on the same card, your payout will be multiplied only by the highest multiplier.

Game result

After the game round is over, your cards are sorted again and only those cards with winnings are left on the screen. Your total winnings are calculated automatically and displayed on your screen.

Click/tap the REPEAT button to repeat your bet from the previous game round, by adding the same number and value of cards. This button becomes available after every game round.

The Autoplay panel will then open, and from here you simply select the number of game rounds you would like your bet to be repeated in. Then click/tap START to Autoplay.

You can keep track of the number of Autoplay rounds remaining as they are displayed in an indicator on the Autoplay button.

Your Autoplay limit will be displayed in the Autoplay panel. (Example: a total bet of \$200 made on the betting grid followed by x10 Autoplay rounds selected by you = Autoplay limit of \$2000.)

Your automatic game rounds will continue until either your chosen number of Autoplay rounds is complete, or you choose to stop Autoplay, by simply clicking/tapping STOP.

Adding a packet of cards or changing their value while Autoplay is running will not immediately stop Autoplay. A message will appear that will allow you to choose to continue Autoplay with your changed bets or to stop Autoplay.

More Games

The LOBBY button (if applicable) can be selected at any time from any game.

It allows you to easily change game table or select any other live game. You will not be removed from this game until you have actually selected the new game/table you wish to join. You can use the LOBBY to browse other games while still playing in your current game.

Multi-Game Play

If you enjoy non-stop action, you can join up to four different game tables simultaneously and view them all in the same browser window!

After you have joined at least one game table, click on LOBBY. In the lobby or game, click the +TABLE button associated with that table to join it. (Certain tables may be unavailable for multi-game play and will therefore not display a +TABLE button.)

After you have joined multiple tables, you will be able to resize your browser window as a whole, but you will not be able to resize each game table window separately.

You can exit any table without affecting your presence at other tables you have joined. To exit a table, click the X button.

Please note:

- You will exit a table automatically if you join the same table through a different device/browser.
- If you click directly on a table icon instead of the +TABLE button, you will merely *switch* tables instead of joining the chosen table *in addition* to the table you joined previously.

We kindly advise you to join only as many tables as your screen can accommodate while still allowing you to place bets deliberately and accurately.
