

HOW TO BET

Choose between 2 to 10 numbers on the 80-number grid and press Play to start the game. The game will randomly draw 20 numbers from 1 to 80.

HOW TO WIN

Winnings are paid according to the payable and depend on how many numbers you have successfully matched with your picks (picks are the numbers you chose before pressing Play). Winning payouts are indicated in the payable on screen and automatically adjust based on the amount of numbers selected and your stake amount.

FORTUNE COINS

Five Fortune Coins will appear on the grid on random numbers outside of your picks at the start of each new game. You can win extra prizes, on top of base game payouts for matching numbers, if you also match Fortune Coins:

- If you match four Fortune Coins, each matched coin will award a cash prize. Prizes for each coin are randomly selected and range from 0.1x to 12.5x your selected stake.
- If you match five Fortune Coins, it will instead trigger the Free Spins bonus round.

MAGICAL ANIMALS

There are four magical animals that can appear randomly during at the end of the base game draw. Each magical animal can produce a special feature event that will have an impact on the outcome of the game.

- The Mouse awards a random win multiplier, between 2x and 8x, which will multiply your base game win.
- The Ox awards between 3 to 5 extra balls that are drawn from the remaining numbers.
- The Tiger awards between 1 to 3 extra games. The extra games are played using the same numbers and the same stake of the game that has triggered the extra game feature. Fortune Coins are not in play and cannot appear during extra games.
- The Pig may appear if you have matched any four out of the five Fortune Coins. The Pig will award the fifth missing Fortune Coin and trigger the Free Spins bonus round.

Only one magical animal can appear during each game.

FREE SPINS BONUS ROUND

Five Fortune Coins matched will trigger the Free Spins Bonus Round.

- Free Spins are played on a grid which has 25 separate boxes arranged in a 5x5 format.
- The five Fortune Coins will appear and land on random positions on the grid and turn into either silver or gold coins.
- Every coin that appears on the grid has a multiplier value that is added to the Total Win counter. The multiplier value of each coin can increase after each Free Spin round under specific conditions.
- The round always starts with 3 spins in the counter. If one or more coins land in one of the 25 segments after a free spin, the spin counter will reset to 3.
- There are 3 type of coin that can appear on the grid during the Free Spins Bonus Round:
 1. Silver Coins with a win multiplier between 1x to 9x.
 2. Gold Coins with a win multiplier between 10x to 50x.
 3. Summon Coins with a win multiplier between 1x to 50x which will also randomly summon one of the Magic Animals to enter the game.
- The Free Spins Bonus Round ends if the spin counter reaches zero or all 25 grid segments are full of coins. To calculate your win amount, the Total Win multiplier is multiplied by the base game stake which triggered the Free Spins Bonus Round.

Magical Animals in Free Spins Bonus Rounds

During the Free Spins Round, each magical animal triggers a specific bonus feature which is different from the magic animals' base game features.

- The Mouse reveals a random multiplier value which is added to every coin's multiplier on the grid.
- The Ox collects the multiplier values from every coin on the grid and adds it to his own coin value.
- The Tiger doubles the multiplier value of one or more coins on the grid.
- The Pig summons the other 3 magical animals and makes them trigger, one by one, their specific features. The 3 magical animals will always appear in the order: Tiger, Mouse and, lastly, the Ox.

RETURN TO PLAYER

The odds of getting a particular outcome is always the same at the start of every game. The odds do not vary based on any prior outcome or event such as bet size, balance size, numbers picked, time of day, day of the week, etc. For example, if the top award is won on a given play of the game, the chances of winning the top award on the next play are exactly the same. Likewise, prior losses do not change future odds.

The outcome of any bonus round is predetermined by the server before you start playing the round. Your choices do NOT interfere with, or influence, the outcome of any of the bonus rounds.

The maximum award payable in this game is 250 000.00. The theoretical average return to player (RTP) is between 89.1% and 93.5% depending on how many numbers are picked in the base game. This RTP represents the long-term expected payback of the game. Malfunction Voids all pays and plays.
