SPECIAL SYMBOLS AND FEATURES

DYNAMITE WILDS AND GAME PROGRESS

The game features are locked at the start of the game. To unlock them you have to land Dynamite Wild symbols which light the fuse. Dynamite Wilds may land on any reel. Each Dynamite Wild counts for 1 step of game progress.

The game progresses in four stages - one for each of the locked features. At the end of each stage a feature is unlocked and a new round starts.

When a feature is unlocked it is triggered in the next spin and triggers randomly in future spins. More than one feature may trigger in the same spin if there is more than one feature unlocked.

Progress breakdown:

- First Stage - 6 Dynamite Wilds required. Unlocks Remove Low-Paying Symbols feature.
- Second Stage - 7 Dynamite Wilds required - 13 in total. Unlocks Random Wilds feature.
- Third Stage - 8 Dynamite Wilds required - 21 in total. Unlocks Multiplier feature.
- Fourth Stage - 9 Dynamite Wilds required - 30 in total. Unlocks Mega Wilds feature.

When a Dynamite Wild lands, it lights the progress fuse and gets removed from the reels, resulting in a lower chance of landing Dynamite Wilds with each step. Once the fourth and final feature is unlocked, Dynamite Wilds will no longer land on the reels.

REMOVE LOW-PAYING SYMBOLS

When this feature triggers, all low-paying symbols are removed from the reels and only high-paying symbols land for this spin.

RANDOM WILDS

When this feature triggers, a random number of Wilds will land on the reels.

MULTIPLIER

When this feature triggers, it adds a Win Multiplier which is applied to the next win that occurs. The Win Multiplier feature cannot retrigger before an already active multiplier is applied.

If a Multiplier is active before you enter Gold Spins, the Multiplier will be applied to the first win that occurs. If a Multiplier is active at the end of the Free Spins, it will be applied to the next win that occurs in the base game.

MEGA WILDS

When this feature triggers, it adds one or more Wild Super symbols of 2x2 to 3x3 size on the reels.

GOLD SPINS

Gold Spins symbols may land on any reel.

3 Gold Spins symbols anywhere on the reels trigger 8 bonus spins. Each additional Gold Spins symbol over the minimum required awards 2 more bonus spins.

Gold Spins symbols may also land during Free Spins. 3 Gold Spins symbols anywhere on the reels during Free Spins trigger 4 additional bonus spins. Each additional Gold Spins symbol over the 3 minimum required awards 1 more bonus spin.

HOW TO PLAY DYNAMITE RICHES

You can have different progress levels at different stakes on the same game, and move between them by changing the stake.

If you are awarded free spins from a promotional campaign any progress in the main game including any locked symbols, will be saved and be available to continue playing at the same stake once the free spins have been completed.

Please note that this stateful game saves its state forever.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

The prize value from one payline is equal to the total stake divided by the number of paylines, multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

Example: Total stake is 2. Total paylines are 20. Symbol multiplier for length of 5 is 300. The win for 1 payline with this symbol and length would be calculated as such: $2 / 20 * 300 = 30$.

The prize value from one payline in a Multiline game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid.

Example: Stake is 2. Symbol multiplier for length of 5 is 20. The win for 1 payline with this symbol and length would be calculated as such: $2 * 20 = 40$.

The prize value from one way or cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

Example: Total stake = 2. Symbol win multiplier = 2. Win = $2 * 2 = 4$.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.

For the best gaming experience, use of the latest version of software is recommended.
Malfunction voids all pays and plays.

Minimum stake: \$0.20
Maximum stake: \$300
Game Version: 3.0.1

The prizes are paid in accordance with the payout table available on the game interface.

Any game in progress for more than 35 days will be cancelled, and the corresponding bet will be refunded.

WITH PROGRESSIVES

Jackpot Game

Win one of the offered jackpot tiers when three or more jackpot symbols appear on the reels or the jackpot is triggered by a game feature. Spin the jackpot wheel to determine which of the offered jackpot tiers will be won. The size of the segments on the jackpot wheel do not correlate to the odds of winning each jackpot tier represented. The chances of winning a jackpot increase in correlation with the size of the stake played. The jackpot is triggered randomly and can be won by playing any of the linked jackpot games. To win the jackpot, the player is not required to make any decision other than to spin the reels. The stake value cannot be changed during free spins. Internet connectivity issues may cause delays in jackpot messages or updates, but they do not affect actual jackpot wins. It is not possible for two players to win the same jackpot. In the event two jackpot winnings occur close to one another the jackpot will be assigned in their respective order. Due to connectivity issues the jackpot value displayed may differ from the effective jackpot value. The jackpot could be temporary deactivated, when this occurs all contributions are paused. The jackpot amount available upon reactivation will be the same as before the deactivation.

Progressive Jackpot

The progressive jackpot is accumulated by all stakes on games offering these jackpots and, in some cases, the jackpots may be offered on multiple websites. A percentage of each total bet is added to a common pot. Part of this contribution is used to form the progressively increasing jackpot amounts, and the other part, contributes to a seed fund, which is the minimum amount of money guaranteed to be made available to players after a jackpot is won by qualifying players. Once the jackpot has been won, a new progressive jackpot will be made available and the process repeats. The jackpot can be triggered and won by a single spin from a single user only. This jackpot does not have a ceiling value and can be won at any time. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

Time Jackpot

The time jackpot is a progressive jackpot which is guaranteed to pay out before a set date and time. The prize pot grows with the contributions from the stake of each spin on a jackpot game, and the closer the prize pot gets to the advertised guaranteed latest payout time, the greater the odds of winning it.

Odds increase up to 100% when the guaranteed latest payout time is reached. Once the jackpot has been won, a new time jackpot will be made available and the process repeats with a new deadline for the next guaranteed payout. The jackpot can be triggered and won by a single spin from a single user only. This jackpot does not have a ceiling but must be won before the date and time specified. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

Dynamic Jackpot Allocation

Only the first \$2 of a stake is eligible to win the time jackpot.

Stake amounts in excess of \$2 are contributed directly to the progressive jackpot.
