JACKPOTS

15/15

The Grand Jackpot is a combination of contributions by all players plus a base win of your total stake x1000.

The Major Jackpot is a combination of contributions by all players plus a base win of your total stake x200.

Players playing the maximum stake will be eligible to win the total Jackpot. Lower staking players will win a proportion of the total Jackpot relative to stake placed. The amount you are eligible to win will be shown in the Jackpot bank. When some or all of the Jackpot is won, it is reset to the base Jackpot win for your stake, plus the current total contributions you are eligible to win. It is not possible for two players to win the Jackpot simultaneously. In instances of apparent simultaneous wins, the games are time-stamped and the first player to trigger the win is awarded the Jackpot. Subsequent players win the base win for their selected stake, plus any new contributions. There is no ceiling value for the Jackpots.

1.0 % of every stake goes directly into the jackpots.

GAME RULES

- This page contains information on how to play this game.
- Please scroll down to read through all topics.

Getting started

- When you start the game, you enter a lobby where you can choose a machine to play this game. Simply click on "Play now" or a vacant machine to begin playing!
- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.
- Within the lobby, you may recognize other players in the same game by a person sitting at a machine. By clicking such a machine, you are entering "spectator mode" and can watch a different player play. You are not able to influence the game which you are spectating in any way.
- Please choose the amount that you would like to take with you into the game directly after entering it.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is \$ 0.25.
- The maximum bet per round is \$ 50.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Winlines

- This game has 5 reels and 25 win lines.
- You can find an overview of the win line pattern via "Paytable & Info".

- Autoplay stops automatically when a feature is awarded.

Winnings

- Winning combinations and payouts are made according to the payable.
- Symbol payout values shown in the payable are dynamic and change in accordance with the selected bet value.
- All prizes are for combinations of a kind. Symbols pay from left to right and must be consecutive, starting from the leftmost reel.
- Highest win only paid per selected line.
- Line wins are added.

Bonus Symbols

- The Wild symbol substitutes for all symbols except for Scatter symbols to help complete winning combinations.
- 5 Diamond symbols appearing anywhere on the reels trigger a re-spin with all Diamond symbols locked in place.
- 6 or more Diamond symbols appearing anywhere on the reels trigger the Diamond Cash™ Feature.
- The Diamond symbols represent Scatters.

RTP Range

- The theoretical RTP (return to player) value for this game is 95.00 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will complete the current round of play.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

WebGL2 WebP
The function covers all pays and plays.

The prizes are paid in accordance with the payout table available on the game interface.
