Wild Bubble Feature

One or more bubbles may appear randomly below each reel and move up one position during a reel spin.

When the reels stop, the bubble lands on a symbol turning the symbol in that position wild.

If a bubble lands on an **Ocean Magic** symbol, the Wild symbol appears on all adjacent symbols. When a bubble expands in this way, only the original bubble moves upward during the next spin.

Bubbles disappear when they move past the top row.

If a bubble lands on a Bonus symbol, it become wild and keeps its bonus trigger functionality.

Rules

Misuse or malfunction voids all pays and plays.

Activating the *Bubble Boost* feature doubles the coin value.

Player's bubble selection during the *Pick* feature does not affect the outcome of the *Pick* feature.

The bubble positions on the reels are persistent per bet level.

All line win symbols must appear on a played line and on consecutive reels, beginning with the left most reel.

Only the highest winner is paid on each payline. Line wins are multiplied by the coin value on the winning line. Coinciding wins on different paylines are added.

Bonus wins are independent of payline wins and are added to the total amount paid.

Wins are shown in currency.

The prizes are paid in accordance with the payout table available on the game interface.

In some jurisdictions, regardless of bet size, there is an award cap on any single transaction. See the paytable for details. A transaction includes the results of the *Free Spins Bonus*, plus the outcome which launched the bonus. If the award cap is reached in a bonus, the bonus ends immediately, even if there are remaining free spins.

Any game in progress for more than 30 days will be cancelled, and the corresponding bet will be refunded.

Additional Information

In addition to the features described in the How to Bet section, the Controls Bar displays the current balance in the chosen currency, the amount paid if a win occurs, and the amount bet on the last/current proposition.

Interrupted Game

In the event of disconnection, an interrupted bonus feature may be resumed immediately by starting the game again. The results of a completed reel spin (where display of the visual result was interrupted) will not be re-displayed within the game but may be reviewed in My History.

Any amount wagered on an unfinished spin will remain paused until you either complete the game or the game is void as a result of account inactivity or system maintenance. When an unfinished spin is void, your bet will be refunded to your account. Any awards earned on an unfinished spin/bonus feature will not be credited unless you resume and complete the game.

Game History

The result of a completed game may be viewed in My History immediately after closing the game window. Results of unfinished games are not displayed in My History.

Expected Payback

In accordance with fair gaming practices required in most legal jurisdictions worldwide, each and every game outcome is completely independent, except in cases where one spin unlocks a feature for a subsequent spin or series of spins, per the game rules. The odds of getting any particular outcome are always the same.

The odds do not vary based on prior outcomes, bet size, balance size, time of day, day of week, etc. For example, if the top award is won on a given play of the game, the chances of winning the top award on the next play are exactly the same. Likewise, prior losses do not change future odds.

The expected payback reflects the theoretical return across a very large number of plays by numerous players over an extended period of time. For this game type, the long-term theoretically expected payback is 94.14% to 96.07%. The results for any given player over a play session can vary widely from this long-term, expected average in either direction. The fewer the number of games played, the wider the normal variance of actual payback that may be experienced.
