**Lucky Lily Keno**

**How to Play**

First select the amount you would like to stake. This is done by clicking on the up and down arrows on the stake window.

Then pick numbers you want.

Picking 6 or more numbers enables the jackpot bonus game.

Matching 6 of 6, 7 of 7, 7 or 8 of 8, 8 or 9 of 9 and 8, 9 or 10 of 10 picks then you play the jackpot bonus game.

Spin the wheel to win either a multiplier times stake, or the progressive jackpot.

Numbers are randomly drawn, the more numbers picked you match the higher the win climbs.

If you match the bonus lucky lily numbers, then the lucky lily multiplier multiplies any win on the main game (not including the jackpot wheel wins) up to a maximum of 16 X.

The progressive jackpot can only be won by one player at a time.

The progressive jackpot amount is displayed at the top of the screen.

The progressive jackpot is only available in real play and is funded by a proportion of each wager when playing the game.

When the progressive jackpot is won, it resets to the initial seed value and begins to rise again.

In the event of a communication error after a progressive jackpot win result has been determined and before it has been displayed on screen, the win amount will automatically be transferred to the player's account.

While the game is live, the progressive jackpot cannot be terminated. If the game is removed, the outstanding pool amount can be transferred to another progressive jackpot.
