## BEST STRATEGY

The best strategy dictates that the selection for positions of wilds and super wilds is always in the position that will move the player closer to a slingo.

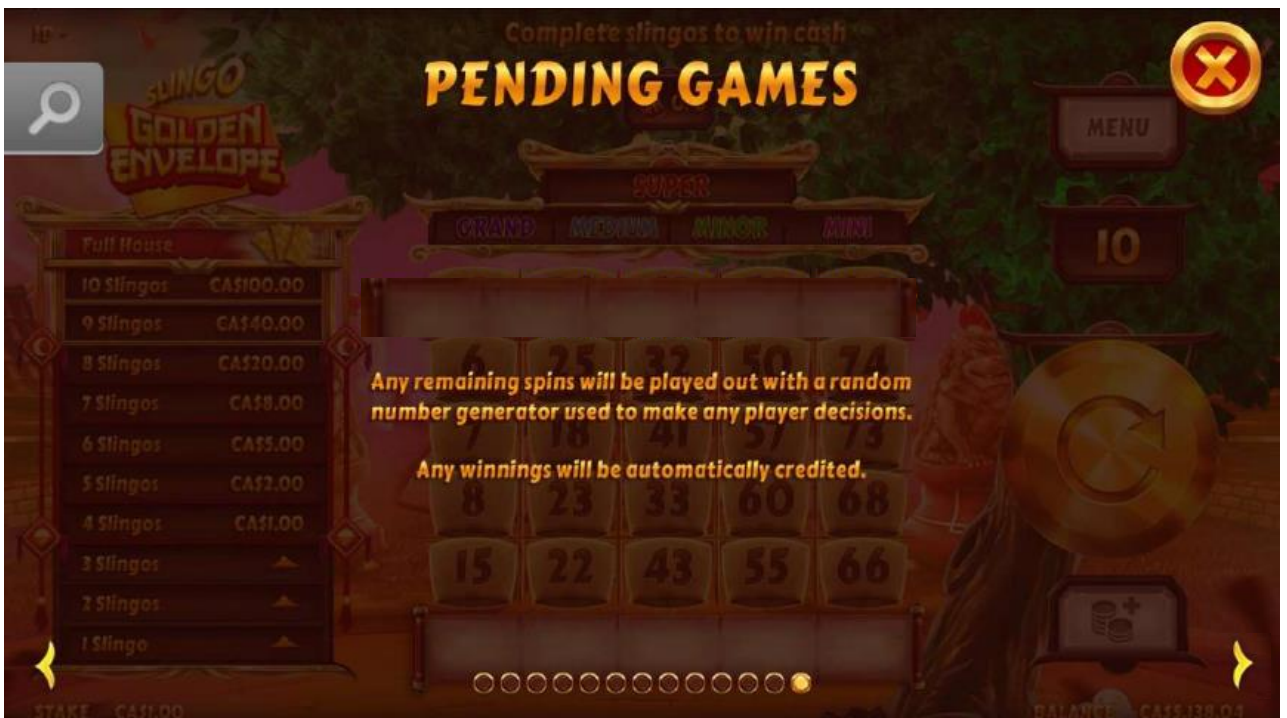

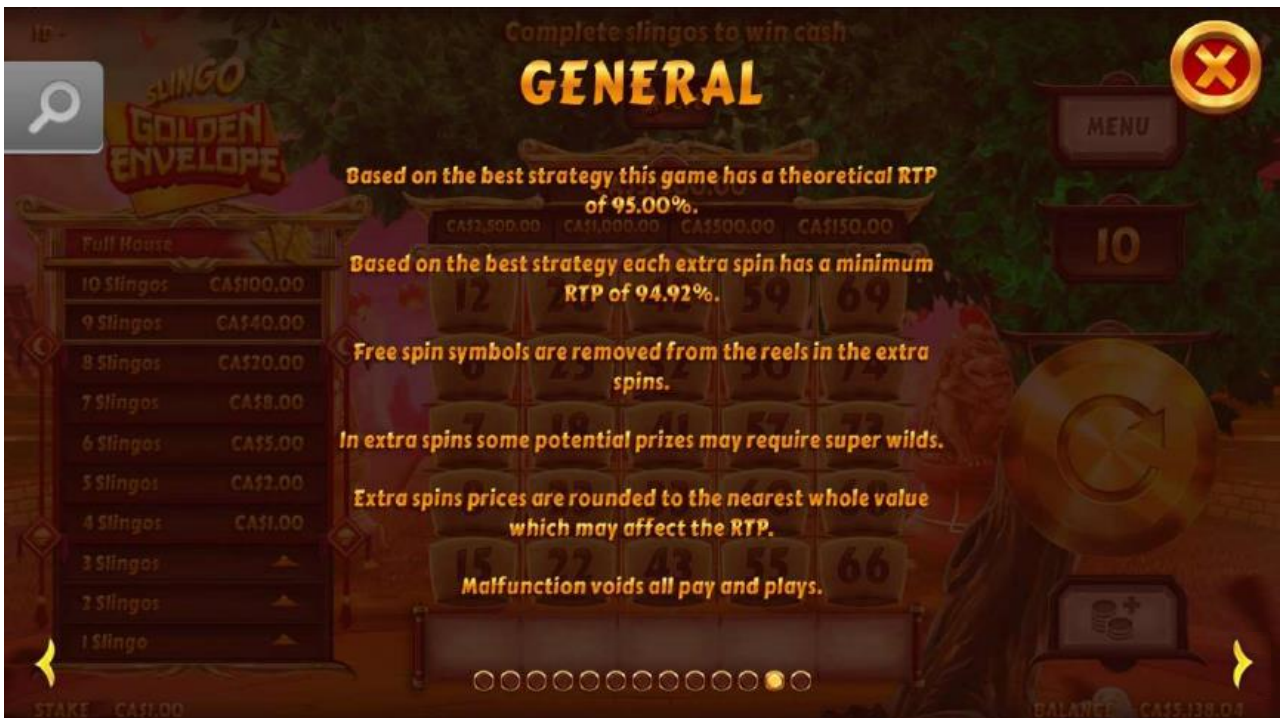

Where multiple positions with the same criteria are available the preference is given to the positions that are included in the most slingos (win lines).

For example, the center square would be given preference since it is included in a horizontal, vertical and two diagonal lines. Where multiple positions with the same criteria exist again a random choice is made.

The prizes are paid in accordance with the payout table available on the game interface.

Any game in progress for more than 3 hours will be completed and the corresponding prize, if any, will be deposited into the account. If a choice that may have an impact on the outcome of the game is required, the game will be completed on the basis of a random choice from among those offered.
