

WIN LINES

All games are played with 30 win lines.
Wins can occur across any or all of the win lines.
Only the highest award is paid per winning combination.
All wins pay left to right across adjacent reels, except Bonus, starting from the leftmost reel.
Wins on different played lines are added.

WILD SYMBOL

When fewer than 3 Bonus Symbols land in view, they will transform into a wild which can have a multiplier attached to it. The multiplier can be between 2x and 5x. Any winning lines which include a wild will be multiplied.

Wilds are available in both the Base Game and the Free Spins bonus.

FREE SPINS BONUS

Bonus symbols are available on reels 2, 3 & 4 in the base game. 3 Bonus Symbols anywhere in view triggers the Free Spins bonus. Upon entering the bonus, the player is initially awarded 8 Free Spins.

When 3 Bonus Symbols land in view, these can have a multiplier value attached to it. The multiplier can be between 2x and 5x. Upon transitioning to the Bonus these will then appear above the reels in which they landed.

Any winning lines which include a wild will be multiplied by the value presented above the reel.

BONUS TOP UP GAMBLE

The Bonus Top Up Gamble is offered following 3 Bonus Symbols landing in the Base Game. This allows the player to gamble for additional Free Spins.

The player has 10 Gamble opportunities. These will visually decrement following the result of any gamble. This will be presented in the 'Gambles Remaining' graphic.

If the pointer stops on the green segment, the Free Spins value are awarded and the Gambles Remaining will decrement.

If the pointer stops on the red segment, the player loses. The player will either exit to the Base Game if all Free Spins are lost, or continue in the Gamble if the player has Free Spins remaining. If the player has Free Spins remaining following the 10 Gambles, the player will transition to the Free Spins with the result of the final Gamble.

The win and lose values can be adjusted by pressing the '-' and '+' arrows, this in turn will adjust the winning and losing segments of the wheel.

Winnings can be gambled up to a maximum 30 Free Spins. Once the maximum amount of Free Spins is reached, the Free Spins are automatically collected and the Gamble will transition to the Bonus.

Press the 'COLLECT' button during the feature to collect your winnings.

The expected payback for the gamble game is 100%.

GAMBLE

The gamble can be configured to be on, on if the win is greater than or equal to 5x bet, or off.

If the gamble is on, any winnings awarded during the game will offer the gamble feature.

If the gamble is on and if the win is greater than or equal to 5x bet, any winnings greater than or equal to 5x bet awarded during the game will offer the gamble feature.

When the gamble is entered, two wheels are presented. The left wheel offers the chance to increase the winnings by one third, double the winnings, or triple the winnings.

The right wheel offers the chance to win Free Spins. The win value can be adjusted by pressing the '-' and '+' arrows, this in turn will adjust the winning and losing segments of the wheel.

Press either wheel during the feature to gamble your winnings and spin the pointer.

If the pointer stops on the green segment, the cash value or Free Spins are awarded.

If the pointer stops on the red segment, the player loses their winnings and exits to the base game.

When the potential winning area of the gamble wheel is at its minimum size the chance of success could be significantly less than the visual representation shown.

Winnings can be gambled up to a maximum win amount of x2500 bet or \$500,000.00, whichever is the lower value. Once the maximum win amount is reached, winnings are automatically collected and the gamble will be exited.

A maximum of 30 Free Spins can be achieved in the gamble for Free Spins wheel. Once this is reached, the Free Spins wheel is disabled, while the player is still able to gamble on the Cash wheel.

Press the 'COLLECT' button during the feature to collect your winnings.

The expected payback for the gamble game is 100%

SPIN CHANCE

Spin Chance is triggered automatically if the credit is reduced below the current price of play, yet is still greater than zero.

Spin Chance offers the player an opportunity to wager their remaining credit in an attempt at winning an additional base game spin at the current bet.

To play Spin Chance, select the 'PLAY' button to begin moving the pointer across the meter.

Alternatively, select the 'NO THANKS' button to exit Spin Chance with the remaining credit.

If the pointer stops on the green segment, a spin at the current bet is awarded and plays automatically.

If the pointer stops on the red segment, the player loses any remaining credit and exits to the base game.

The red and green segments are proportional to the amount of credit in relation to the current bet.

The chance of winning a spin is determined by this ratio.
