## Rules

---

Misuse or malfunction voids all pays and plays.

All line win symbols must appear on a played line and on consecutive reels, beginning with the far left reel.

Only the highest winner is paid on each payline. Line wins are multiplied by the line bet on the winning line. Coinciding line wins on different paylines are added.

The Wild symbol substitutes for all symbols except the Scatter, Jackpot, and Bonus symbols.

The Wild symbol appears on reels 1, 2, and 3 only.

Bonus wins are independent from line wins and are added to the total amount paid.

Wins are shown in currency.

The prizes are paid in accordance with the payout table available on the game interface.

In some jurisdictions, regardless of bet size, there is an award cap on any single transaction. See the payable for details. A transaction includes the results of the bonus, plus the outcome which launched the bonus. If the award cap is reached in the bonus, the bonus ends immediately, even if there are remaining free spins.

Any game in progress for more than 30 days will be cancelled, and the corresponding bet will be refunded.

## **Additional Information**

### Expected Payback

In accordance with fair gaming practices required in most legal jurisdictions worldwide, each and every game outcome is completely independent, except in cases where one spin unlocks a feature for a subsequent spin or series of spins, per the game rules. The odds of getting any particular outcome are always the same.

The odds do not vary based on prior outcomes, bet size, balance size, time of day, day of week, etc. For example, if the top award is won on a given play of the game, the chances of winning the top award on the next play are exactly the same. Likewise, prior losses do not change future odds.

The expected payback reflects the theoretical return across a very large number of plays by numerous players over an extended period of time.

The theoretical return for this game is 96.27%.

The results for any given player over a play session can vary widely from this long-term, expected average in either direction. The fewer the number of games played, the wider the normal variance of actual payback that may be experienced.
