### Game Instructions

The Vault of Lions™ is a slotmachine game with 5 reels and 17 paylines.

## How to play

Press BET button to select the desired bet for the round.

Press PLAY button to start the round.

## Winnings

Paylines, win combinations and win sums are displayed in the payable. The win combination must be on a payline and placed on adjacent reels starting from the leftmost reel. Only the win for the most valuable symbol combination is paid out per payline. If several paylines have winning symbol combinations the wins are added together.

Press COLLECT to transfer the win to your balance or press GAMBLE to try to increase the win in the gamble feature.

The maximum win multiplier per game round (base game + any free spins and bonus games) is 600 times the total bet. If the win for a game round reaches this limit, the game round ends immediately, and any remaining free spins or bonus games will not be played. The player is awarded a win according to the maximum win multiplier.

## Wild

There is a Wild symbol in the game that replaces all other base symbols. A Wild is always used to form the best possible winning combination.

## Bonus

### Respin

Exactly five Money Symbols scattered on the reels trigger the Respin feature. The money symbols are locked in place and the rest of the reels are spun. Any new money symbols trigger the bonus game. Any line wins during the Respin feature are paid normally.

## Vault bonus game

Six or more money symbols triggers the bonus game.

All collected money symbols are locked into place and transferred to the bonus game. The spin counter starts at three spins. The player begins the bonus round by pressing the PLAY button. Each empty round reduces the spin count by one. Every time a new money symbol (1x, 1.5x, 2x, 3x, 5x, 10x, 20x, or 30x the bet) appears on the reels the spin counter is reset back to three. Three empty rounds or all the money symbols have been collected, ends the bonus game. All the sums on the money symbols are collected with a possible jackpot win.

The bonus game rounds are not charged from the players balance. The bet throughout the bonus game is the same with which the bonus game rounds were won.

The minimum total win in the bonus game is 6 x bet.

## Bonus game 2x feature

A 2x feature may trigger randomly during any bonus spin. Any collected money symbols during that single round are doubled. 2x feature does not affect the Jackpot wins.

## Jackpot

The game has a three tier fixed jackpot. The jackpot is won by collecting either one, two or three (all) full rows of money symbols during the bonus game.

Minor Jackpot: One full row of money symbols wins 20x the bet

Major Jackpot: Two full rows of money symbols wins 100x the bet

Grand Jackpot: Three full rows of money symbols wins 500x the bet

The jackpots do not stack. Only the highest achieved tier is paid out. The jackpot can only be won during the bonus game.

## Gamble

In the double function, you must choose one of three options:

Multiplier 2x

Multiplier 8x

Multiplier 2x

If your choice is correct, you win the sum being doubled, multiplied by the multiplier of the chosen symbol. After this, you can continue using the double function or collect the winnings.

If your choice is incorrect, you lose the sum being doubled and the double function ends.

The maximum win from the Gamble feature is limited to the game's maximum win multiplier.
