

MARBLINGO

OVERVIEW

MarblinGO is a marble-launching game where you need to try to win prizes by landing marbles in baskets at the bottom of the game board. The game includes two features: the Second Chance feature, which automatically keeps marbles in play by bouncing them back into the game, and the +1 marbles feature, which randomly splits marbles to increase the number of marbles in play.

HOW TO PLAY

- You are given a set number of marbles.
- Choose to launch the marbles one at a time or in clusters of five.
- The marbles fall through a pyramid of pegs, bouncing off them as they make their way toward the baskets at the bottom of the board.
 - Each basket has a prize amount displayed. When the required number of marbles lands in a basket, the player wins the prize displayed for that basket.
 - Some baskets may contain multiple stacked prizes, and landing additional marbles in those baskets unlocks further rewards.

+1 MARBLES FEATURE

The +1 marbles feature is randomly activated during gameplay. When triggered, a marble splits into two marbles, giving the player more chances to win prizes.

SECOND CHANCE FEATURE

The game includes a Second Chance feature, activated when a marble hits the blue glowing peg on the game board. When triggered, the gaps between the baskets are replaced with trampolines that bounce marbles back into play. If the feature is not activated, marbles that fall into the gaps between the baskets are lost from play.

End of Game

The game ends when all marbles have been launched and either collected in baskets or lost through the gaps on the game board. At this point, all accumulated winnings are awarded to the player.

PAYOFF RATE

This game has a theoretical payoff rate of 89 %.
