## RULES

Pay table shows the winning values for the currently selected stake.

All non-scatter wins must appear on a valid winline and on consecutive reels, beginning with the far left reel.

Only the highest line win is paid on each line.

All valid line wins in view are added together and paid.

The prizes are paid in accordance with the payout table available on the game interface.

Bonus symbols are scatter wins and are awarded in any position on the reels specified.

Scatter symbols trigger bonuses in addition to line wins.

The bonus games are a presentation of a predetermined outcome.

Reels may rewind from a losing to a winning position. This is a visual delivery of a predetermined line win or bonus and will appear in your account history as that predetermined win rather than as a Rewind bonus.

All players are eligible to win the progressive jackpot on every game. The progressive jackpot is funded by a fixed percentage contribution from every bet placed and is specific to this game. If a player wins the progressive, but, due to a communication error, this win has not yet been displayed on the player screen, the progressive amount won will automatically be transferred to the player's Espacejeux account.

In the event of the progressive jackpot being won, other players playing the game will be informed of the new jackpot value and offered the option to void the present bet. This is only relevant if the jackpot display on the other players' games has not been updated to this new value yet.

In the event a progressive seems to have been won by multiple players simultaneously, should there be a discrepancy between the progressive amount displayed on the players' screens and the amount recorded in Loto-Québec's computer system, the latter shall prevail.

The maximum win on any transaction is capped and the level of that cap is shown on the final page of the in-game paytable. A transaction includes the combined results of all spins and bonuses awarded.

Bets placed in incomplete games that remain undecided will become void.

Should you get disconnected during play we strongly recommend that on reconnection you re-launch the game and ensure any outstanding transactions are completed.

Minimum and maximum bets vary depending on currency. To determine the parameters of the game, use the '+' and '-' buttons to increase/decrease the bet per line options. You will not be able to go beyond the minimum and maximum limits. You are not committed to any bet until you press 'Spin'.
