Game Objective

Dead or Alive: Saloon is a card-guessing game with unique bonuses, an entertaining Wild West atmosphere and an immersive Bounty Hunt bonus game.

Players bet on cards to predict the playing card that will be dealt and hope to draw bonus cards that will increase their winnings.

Game Rules

The game is played with a deck that consists of 52 standard cards and 52 bonus cards (Double cards, Bounty cards, and Multiplier cards), which are shuffled after each game round. The objective of the game for the player is to correctly guess which one of the standard playing cards will be drawn by betting on a specific card or several cards with a specific value (2–Ace) or suit. The player may also bet on all cards.

For example, if the player clicks/taps on 10 on the bottom of the betting grid, the selected chip value will be placed on four cards (all four 10s in the grid). Similarly, if the player clicks/taps on a suit on the left/right side of the betting grid, the selected chip value will be placed on all 13 cards of that suit in the grid. Finally, if the player clicks/taps on ALL, bets will be placed on all cards.

Once the betting time is over, the game presenter draws cards from the deck one by one until a standard card is drawn, ending the round.

The deck contains:

- 52 standard cards
- 3 Double cards
- 6 Bounty cards
- 20 20x Multiplier cards
- 19 30x Multiplier cards
- 3 50x Multiplier cards
- 1 100x Multiplier card

During the round, the potential win is shown to the player. The default potential win is 20x.

If a 20x, 30x, 50x or 100x Multiplier card is drawn, that amount gets added to the existing potential win amount. For example, if the existing potential win amount is 20x and a 20x card is drawn, the potential win amount becomes 40x.

If a Double card is drawn, the existing potential win amount is doubled. For example, if the existing potential win amount is 40x and a Double card is drawn, the potential win amount becomes 80x. The Double card does not affect the value of future bonus cards.

If a Bounty card is drawn, a Bounty Hunt bonus round is played.

In the Bounty Hunt bonus round, the player is presented with three targets, each holding a different hidden multiplier bonus (10x–200x). The target that the player chose reveals the multiplier that will be added to the player's potential win amount.

If no decision was made during the decision time or any interruption occurred, the decision will be made automatically and the card will be picked randomly. The round ends when a standard card is drawn.

Error Handling

If there is an error in the game, system or game procedure, the game round will be temporarily paused while the game host/presenter notifies the service manager. You and other players will be notified via Chat, or by an on-screen pop-up message, that the issue is being investigated. If the manager can immediately resolve the error, the game round will continue as normal. If immediate resolution is not possible, the game round will be cancelled, and initial bets will be refunded to all players who participated in the game round.

If you are disconnected from a game round, any placed bets remain valid and are settled in your absence. Upon reconnecting, you can view bet outcomes in the History window.

More Games

The LOBBY button can be selected at any time from any game.
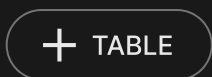

❯ LOBBY

It allows you to easily change the game table or select any other live game. You will not be removed from this game until you have actually selected the new game/table you wish to join. You can use the LOBBY to browse other games while still playing in your current game.

Multi-Game Play

If you enjoy non-stop action, you can join more than one game table — then view and play them simultaneously, all in the same browser window!

After you have joined at least one game table, click on LOBBY. In the lobby or game, click the +TABLE button associated with that table to join it. Certain tables may be unavailable for multi-game play and will therefore not display a +TABLE button.

+ TABLE

After you have joined multiple tables, you will be able to resize your browser window as a whole, but you will not be able to resize each game table window separately.

You can exit any table without affecting your presence at other tables you have joined. To exit a table, click the X button.

Please note:

- You will exit a table automatically if you join the same table through a different device/browser.
- If you click directly on a table icon instead of the +TABLE button, you will merely *switch* tables instead of joining the chosen table *in addition* to the table you joined previously.

We kindly advise you to join only as many tables as your screen can accommodate while still allowing you to place bets deliberately and accurately.
