The Grand Jackpot is a combination of contributions by all players plus a base win of your total stake x1000.

The Major jackpot is a combination of contributions by all players plus a base win of your total stake x200.

Players playing the maximum stake will be eligible to win the total jackpot. Lower staking players will win a proportion of the total jackpot relative to stake placed. The amount you are eligible to win will be shown in the jackpot bank. When some or all of the jackpot is won, it is reset to the base jackpot win for your stake, plus the current total contributions you are eligible to win. It is not possible for two players to win the jackpot simultaneously. In instances of apparent simultaneous wins, the games are time-stamped and the first player to trigger the win is awarded the jackpot. Subsequent players win the base win for their selected stake, plus any new contributions. There is no ceiling value for the jackpots.

1.0 % of every stake goes directly into the jackpots.

- Within the lobby, you may recognize other players in the same game by a person sitting at a machine. By clicking such a machine, you are entering "spectator mode" and can watch a different player play. You are not able to influence the game which you are spectating in any way.
- Please choose the amount that you would like to take with you into the game directly after entering it.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is \$ 0.25.
- The maximum bet per round is \$ 100.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.

- Only the highest win per line is paid.
- Highest win only paid on each selected line and per scatter combination.
- Scatter wins and line wins are added.

Bonus Symbols

- The Wild symbol substitutes for all symbols except for Scatter symbols to help complete winning combinations.

- 6 or more Diamond symbols appearing anywhere on the reels trigger the Diamond Cash feature.

RTP Range

- The theoretical RTP (return to player) value for this game is 95.00%.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will complete the current round of play.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.
