

Game Objective

Dragon Tiger is a very easy and fast-paced game. The game objective is to guess whether the Dragon or Tiger will draw the higher value card, and therefore win. Player may also bet on whether the Dragon and Tiger cards dealt will be of the same value, and therefore a Tie.

Game Rules

The aim of the Dragon Tiger is to predict which of the hands – the Dragon or the Tiger – will win or if it will be a Tie.

- The cards are dealt from a shoe with eight decks (Jokers are excluded)
- The player places a bet on either the Dragon, or Tiger, or Tie, or Suited Tie
- A single card face-up is dealt by the dealer to the Dragon and to the Tiger
- Card value from the lowest to the highest is as follows: Ace with value 1, being the lowest and followed by 2 and so on, and King the highest (A-2-3-4-5-6-7-8-9-10-J-Q-K)
- If cards for the Dragon and Tiger are equal both in value and suit, it's a Suited Tie, **half of your main bet** (the Dragon/Tiger bet) is returned and wins pay out 50:1
- The highest card wins and pays even money 1:1
- In the case of a Tie, **half of your main bet** (the Dragon/Tiger bet) is returned and wins pay out 11:1

Payouts

Your payout depends on the type of bet placed.

BET	PAYS
DRAGON	1:1
TIGER	1:1
TIE	11:1
SUITED TIE	50:1

Please note that any malfunction voids the game round and all eventual payouts for the round. Bets will be returned.

Return to Player

The optimal theoretical return-to-player percentage:

- Main bet (DRAGON/TIGER) – 96.27%
- TIE – 89.64%
- SUITED TIE – 86.02%

Place Bets

The BET LIMITS panel shows the minimum and maximum allowed bet limits at the table, which may change from time to time. Open the Bet Limits to check your current limits.

Dragon Tiger \$ 5 - 1,000

To participate in the game, you must have sufficient funds to cover your bets. You can see your current BALANCE on your screen.

BALANCE
\$ 100,000

The TRAFFIC LIGHTS tell you the current status in the game round by informing you of when you can bet (GREEN light), when the betting time is nearly over (YELLOW light), and when betting time has expired (RED light).

PLACE YOUR BETS

The CHIP DISPLAY allows you to select the value of each chip you wish to bet. Only chips of denominations that can be covered by your current balance will be enabled.

Once you have selected a chip, place your bet by simply clicking/tapping the appropriate betting spot on the game table. Each time you click/tap the betting spot, the amount of your bet increases by the value of the selected chip or up to the maximum limit for the type of bet you have selected. Once you have bet the maximum limit, no additional funds will be accepted for that bet, and a message will appear above your bet to notify you that you have bet the maximum.

NOTE: Please do not minimise your browser or open any other tab in your browser while betting time remains, and you have placed bets on the table. Such actions may be interpreted as leaving the game, and your bets will therefore be declined for that particular game round.

The REPEAT button allows you to repeat all bets from the previous game round. This button is available only before the first chip is placed.

The DOUBLE (2x) button becomes available after you have placed any bet. Each click/tap doubles all your bets up to the maximum limit. Note that you must have a sufficient account balance to double ALL your placed bets.

The UNDO button removes the last bet you placed.

You can click/tap the UNDO button repeatedly to remove bets, one by one, in the reverse order of which they were placed. You can clear all your bets by holding the UNDO button.

The TOTAL BET indicator displays the total amount of all bets placed in the current round.

Bet Statistics

Shows the percentages of all bets placed on the DRAGON, TIGER and TIE.

Chat

You can chat with the dealer and other players. Enter your message in the CHAT field. To post your message, press Enter or the arrow button within the field.

Use the CHAT button to enlarge or, alternatively, to close the chat window.

You can resize and move the chat window anywhere on your screen.

Scorecards

Dragon Tiger streaks and trends for either the Dragon or the Tiger using a particular shoe are recorded in various scoreboards. These pictorial representations of past round results and other statistics regarding the current shoe may be of help to you in predicting the results of future rounds.

The BEAD ROAD and BIG ROAD display the results of each past round, while the **Big Eye Road**, **Small Road** and **Cockroach Road** display patterns derived from the BIG ROAD.

Roads and shoe statistics are always cleared when a new shoe is introduced.

BEAD ROAD

Each cell in the BEAD ROAD represents the result of a past round. The result of the earliest round is recorded in the upper left corner. Read the column downwards all the way to the bottom; then start at the top of the adjacent

column to the right and so forth. A solid red cell indicates a Dragon win. A solid yellow cell represents a Tiger win. A solid green cell represents a Tie.

You can change the Bead Road display from English to Simplified Chinese or Score Mode by clicking/tapping it anywhere.

BIG ROAD

In the BIG ROAD, the result of the earliest round is recorded in the upper left corner.

A new column is created each time the Dragon's winning streak changes in favour of the Tiger, or vice versa.

A cell outlined in red indicates a Dragon win. A cell outlined in yellow indicates a Tiger win.

A Tie is recorded as a green line through the cell for the preceding round. If the first round is a Tie, the green line will appear first, and the red or yellow outline will appear around the line once the Dragon or Tiger wins a round.

If there are two or more consecutive tie rounds, the number on line will show the number of ties.

DERIVED ROADS

For the true Dragon Tiger enthusiast, the **Big Eye Road**, **Small Road** and **Cockroach Road** are included to display *patterns* derived from past results recorded in the BIG ROAD. The Big Eye Road uses outlined circles, the Small Road uses solid circles, and the Cockroach road uses slashes. However, in these derived roads, the colours red and yellow do not correspond to Dragon and Tiger wins, and there is no way to discern ties. In derived roads, red entries are a sign of repetition, whereas yellow entries signal a more erratic, "choppy" shoe.

The derived roads do not start at the very beginning of the shoe. They start with the hand following the first hand in the second, third and fourth columns of the BIG ROAD. Once a derived road starts, an additional red or yellow symbol is added after every round.

SHOE STATISTICS

The following statistics based on the current shoe are displayed for you:

- # - The number of completed rounds thus far.
- Dragon - The number of Dragon wins thus far.
- Tiger - The number of Tiger wins thus far.
- Tie - The number of Tie rounds thus far.

#11 D 6 T 5 T 0

ROAD PROBING TABLE

The Road PROBING Table displays the icon that will be added to the three derived roads if the next round is won by the Dragon or the Tiger. Click the Dragon (D) or Tiger (T) button to see the icon that will be added in the roads if the next round is won by the Dragon or the Tiger.

Autoplay

Once you have placed a bet, Autoplay allows you to repeat your selected bet or bets for a chosen number of game rounds.

To start Autoplay, place your bets on the betting grid as usual and then click/tap the Autoplay button.

The Autoplay panel will then open, and from here you simply select the number of game rounds you would like your bet to be repeated in. Then click/tap START to Autoplay.

You can keep track of the number of Autoplay rounds remaining as they are displayed in an indicator on the Autoplay button.

Your Autoplay limit will be displayed in the Autoplay panel. (Example: a total bet of €200 made on the betting grid followed by x10 Autoplay rounds selected by you = Autoplay limit of €2000.)

Your automatic game rounds will continue until either your chosen number of Autoplay rounds is complete, or you choose to stop Autoplay, by simply clicking/tapping STOP.

Placing additional bets on the betting grid or doubling your bets while Autoplay is running will not stop Autoplay. A message will appear that will allow you to choose to continue Autoplay with your changed bets or to stop Autoplay.

Game Number

Each game round is identified by a unique GAME NUMBER.

21:10:10

This number reflects when the game round began in terms of GMT by *hour: minute: second*. Please use this game number for reference (or take a screenshot of the game number) if you wish to contact Customer Service regarding a particular round.

Sound

The SOUND button will mute/unmute all game sounds and voice from the game. Note that if you change tables, the sound will automatically unmute.

You can alter your sound settings by clicking/tapping the SETTINGS button and then selecting the SOUND tab.

Game History

The HISTORY button will launch a window showing all game rounds you have played and the results of those rounds.

You can review your past gaming activity by viewing your:

- ACCOUNT HISTORY – Shows your complete account history as a list of dates, games, bet amounts and payouts. The game round completed most recently appears at the top of the list.
- GAME HISTORY – Shows your history related to a particular game once you click/tap the game in the GAME column.

Settings

The SETTINGS button launches a menu of user-changeable settings.

Your chosen settings will be applied at once and will be stored to your profile. Stored settings will be launched automatically when you log in from any device.

You can alter your general and game settings.

Settings are organised under several main tabs in the SETTINGS window:

GENERAL

- You can hide/unhide other players' chat messages.

VIDEO

Your video quality is auto-adjusted, but you can manually change your video quality by selecting the specific stream.

SOUND

You can mute/unmute your DEALER'S VOICE and GAME SOUND and adjust their relative volumes.

Deposit and Withdraw

The CASHIER button will open the cashier/banking window for deposits and withdrawals.

Responsible Gaming

The RESPONSIBLE GAMING button allows you to access the page outlining the Responsible Gaming policy. This page provides useful information and links

regarding responsible online gaming behaviour and how to set limitations to your game sessions.

Error Handling

If there is any error in the game, system or game procedure, the game round will be temporarily paused while the dealer notifies the shift manager. You and other players will be notified via Chat, or by an on-screen pop-up message, that the issue is being investigated. If the manager can immediately resolve the error, the game round will continue as normal. If immediate resolution is not possible, the game round will be cancelled, and initial bets will be refunded to all players who participated in the game round.

Disconnection Policy

If you are disconnected from a game round, any placed bets remain valid and are settled in your absence. Upon reconnecting, you can view bet outcomes in the History window.

Shuffling

Game-play continues until the cut card is dealt. Subsequently, the cards are shuffled by a dealer or a shuffler.

If a shuffle table is available, then two shoes with two sets of playing cards are used at the table. In this case, the dealer swaps the shoes, and the shuffle is performed by a shuffler at the shuffling table while the dealer continues to host the game round.

More Games

The LOBBY button (if applicable) can be selected at any time from any game.

It allows you to easily change game table or select any other live game. You will not be removed from this game until you have actually selected the new game/table you wish to join. You can use the LOBBY to browse other games while still playing in your current game.

Multi-Game Play

If you enjoy non-stop action, you can join up to four different game tables simultaneously and view them all in the same browser window!

After you have joined at least one game table, click on LOBBY. In the lobby or game, click the +TABLE button associated with that table to join it. (Certain tables may be unavailable for multi-game play and will therefore not display a +TABLE button.)

After you have joined multiple tables, you will be able to resize your browser window as a whole, but you will not be able to resize each game table window separately.

You can exit any table without affecting your presence at other tables you have joined. To exit a table, click the X button.

Please note:

- You will exit a table automatically if you join the same table through a different device/browser.
- If you click directly on a table icon instead of the +TABLE button, you will merely *switch* tables instead of joining the chosen table *in addition* to the table you joined previously.

We kindly advise you to join only as many tables as your screen can accommodate while still allowing you to place bets deliberately and accurately.
