Game Instructions

Northern Jack™ is a slot machine game with five reels and 11 paylines. Your goal is to get a winning combination of symbols.

How to play

- Press BET button to select the desired bet for the round.
- Press PLAY button to start the round.

Winnings

Paylines, win combinations and win sums are displayed in the paytable. The win combination must be on a payline and placed on adjacent reels. Only the win for the most valuable symbol combination is paid out per payline. If several paylines have winning symbol combinations the wins are added together.

Press COLLECT to transfer the win to your balance or press GAMBLE to try to increase the win in the gamble feature.

The maximum win multiplier per game round (base game + any free spins and bonus games) is 250 times the total bet. If the win for a game round reaches this limit, the game round ends immediately, and any remaining free spins or bonus games will not be played. The player is awarded a win according to the maximum win multiplier.

Bonus

The bonus game starts when the Northern Jack symbol appears on the first reel and the Emma symbol appears on the fifth reel. You must select one of three bonus options from the bonus map that opens.

Gold mine:

The goal of the Gold mine bonus game is to dig up winning symbols from a stone wall the size of the 3x3 grid. The bonus game has a total of six selections. The squares may reveal an empty space, a win (1x, 2x, 3x, 5x, 10x times your bet) or a win factor (+1x or +2x). When you have made two selections, the wins and factors are collected, and new symbols replace the previous ones. At the end of the bonus selection, all wins collected in the bonus games are multiplied by the win factor collected until this point.

Crystal stream:

In the Crystal stream bonus game, you select one of the four buckets, revealing the number of bonus rounds.

The number of rounds can be 4, 6, 8 or 12.

For each bonus round, a draw is made for whether a winning symbol or an empty symbol hits a grid of 3x3. The value of winning symbols can be 1x, 2x, 3x, or 5x times the bet. If a winning symbol hits the grid, it will remain in place for the entire bonus game, and symbols will no longer be drawn for the spot in question. The bonus game ends when the grid is full of winning symbols or when the rounds end. At the end of the bonus game, all winning symbols in the grid are added together.

Photo mound:

In the Photo mound bonus game, symbols are selected from the game area. Behind the selection, a half of a photo is revealed, which moves to the paytable. Selections are made until one of the photos in the paytable gets both halves. At this point, the bonus game will end and the win matching the photo will be paid out. The value of photos can be 3x, 4x, 6x, 10x or 20x times the bet.

Free spins

At least three free spin symbols anywhere on the reels trigger free spins:

- Three free spin symbols: 5 free spins
- Four free spin symbols: 15 free spins
- Five free spin symbols: 20 free spins

Free spins can be won again during free spins in the same way they are triggered from the base game. The bonus game cannot be won during free spins.

Gamble

Press GAMBLE to try to increase the winnings in the gamble feature.

In the gamble feature, the player must select one of three options (2x, 15x, 2x).

If the choice is correct, you win the gambled sum multiplied with the number on the selected symbol. You can then continue the gamble or collect your winnings. If either of the 2x options was selected and the result of the gamble is 15x, the gambled bet is paid back. In this case, you can continue the gamble or collect your winnings.

If the choice is incorrect, you lose the gambled sum and gambling ends.

The maximum win from the Gamble feature is limited to the game's maximum win multiplier.
