Payback Information

In accordance with fair gaming practices required in most legal jurisdictions worldwide, each and every game outcome is completely independent, except in cases where one spin unlocks a feature for a subsequent spin or series of spins, per the game rules. The odds of getting any particular outcome are always the same.

The odds do not vary based on prior outcomes, bet size, balance size, time of day, day of week, etc. For example, if the top award is won on a given spin of the game, the chances of winning the top award on the next spin are exactly the same. Likewise, prior losses do not change future odds.

The expected payback reflects the theoretical return across a very large number of spins by numerous players over an extended period of time.

For this game, the long-term, theoretically expected payback is from 87.30% to 96.10%. The results for any given player over a play session can vary widely from this long-term, expected average in either direction. The fewer the number of games played, the wider the normal variance of actual payback that may be experienced.

The expected payback value is also based upon correct player choices for any games which involve main game and/or bonus game play strategy.

If applicable, the maximum win on any transaction including the results of any triggered bonus, plus the outcome which launched the bonus, is capped at \$1,200.00.
