GAMBLE

The gamble can be configured to be on, on if the win is greater than or equal to 5x stake, or off.

If the gamble is on, any winnings awarded during the game will offer the gamble feature.
If the gamble is on and if the win is greater than or equal to 5x stake, any winnings greater than or equal to 5x stake awarded during the game will offer the gamble feature.

When the gamble is entered, two wheels are presented. The left wheel offers the chance to increase the winnings by one third, double the winnings, or triple the winnings.

The right wheel offers the chance to win Free Spins. The win value can be adjusted by pressing the '-' and '+' arrows, this in turn will adjust the winning and losing segments of the wheel.

If the pointer stops on the green segment, the cash value or Free Spins are awarded.

If the pointer stops on the red segment, the player loses their winnings and exits to the base game.

When the potential winning area of the gamble wheel is at its minimum size the chance of success could be significantly less than the visual representation shown.

Winnings can be gambled up to a maximum win amount of £250,000.00. Once the maximum win amount is reached, winnings are automatically collected and the gamble will be exited.
A maximum of 30 Free Spins can be achieved in the gamble for Free Spins wheel. Once this is reached, the Free Spins wheel is disabled, while the player is still able to gamble on the Cash wheel.

SPIN CHANCE

Spin Chance is triggered automatically if the credit is reduced below the current price of play, yet is still greater than zero.

Spin Chance offers the player an opportunity to wager their remaining credit in an attempt at winning an additional spin at the current bet.

To play Spin Chance, select the 'PLAY' button to begin moving the pointer across the meter. Alternatively, select the 'NO THANKS' button to exit Spin Chance with the remaining credit.

If the pointer stops on the green segment, a spin at the current bet is awarded and plays automatically. If the pointer stops on the red segment, the player loses any remaining credit and exits to the base game.

The red and green segments are proportional to the amount of credit in relation to the current bet. The chance of winning a spin is determined by this ratio.
