GAME RULES

- This page contains information on how to play this game.
- Please scroll down to read through all topics.

Getting started

- When you start the game, you enter a lobby where you can choose a machine to play this game. Simply click on "Play now" or a vacant machine to begin playing!
- This game is a casino game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.
- Within the lobby, you may recognize other players in the same game by a person sitting at a machine. By clicking such a machine, you are entering "spectator mode" and can watch a different player play. You are not able to influence the game which you are spectating in any way.
- Please choose the amount that you would like to take with you into the game directly after entering it.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is $ 0.50.
- The maximum bet per round is $ 50.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Winlines

- This game has 5 reels and 50 win lines.
- You can find an overview of the win line pattern via "Paytable & Info".

Autoplay

- Clicking on "Auto" starts automatic spins.
- If "Autoplay" is activated the button label becomes green. Clicking it again stops the automatic spins.
- Autoplay stops automatically when the total bet is higher than your current funds.
- Autoplay stops automatically when a feature is awarded.

Winnings

- Winning combinations and payouts are made according to the paytable.
- Symbol payout values shown in the paytable are dynamic and change in accordance with the selected bet value.
- All prizes are for combinations of a kind, consecutive from left to right starting with the leftmost reel on selected lines, except Scatters.
- Highest win only paid on each selected line and per scatter combination.
- Scatter symbols pay regardless of their position.
- Scatter wins and line wins are added.

RTP Range

- The theoretical RTP (return to player) value for this game is 94.57 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will complete the current round of play.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.

The prizes are paid in accordance with the payout table available on the game interface.

Any game in progress for more than 2 hours will be completed and the corresponding prize, if any, will be deposited into the account.

Jackpots

- 0.95 % of every stake goes directly into the jackpots.
- The jackpots are initially seeded at $ 500.00 / $ 10 000.00 (or the equivalent in your account currency if different). When a jackpot is won, it is reset to the seed value.
- Each jackpot is the sum of its seed plus the contributions to this jackpot from all players.
- Each jackpot has the same win amount for each bet level but the probability of a jackpot hit rises proportionally to your stake. Higher staking players are more likely to win a jackpot than lower staking players, with the highest probability to win a jackpot at maximum bet.
- Subsequent players will win the reseeded jackpot, plus any new contributions.
- There is no ceiling value for the jackpots.
- The base currency of this game may be different to the currency of your account. When that is the case, the progressive jackpot is shown at its current value in your account currency. That amount may go up or down depending on fluctuations in exchange rates.

Gambling

- With your current stake, a maximum of $ 250.00 can be bet while gambling.
- During autoplay gambling is not possible.
- Any base game wins that coincide with a CLOVER FEATURE trigger are part of the feature game win and cannot be gambled.
- The feature game win of a CLOVER FEATURE is awarded directly and cannot be gambled.
