## **SLOT RULES**

This is a 5-reel slot with 3 rows. The player participates in each spin of the slot game with 30 paylines, which are fixed and can't be changed.

**The minimum base bet** is equal to \$ 0.01, while the maximum base bet is equal to \$ 1,00. Each base bet is multiplied by the paylines.

Once the chosen total bet has been selected, by clicking on the **Spin** button, you start spinning the reels to determine the result of your game.

While the reels are spinning, you can click on **Stop** to stop the reels from moving. If you do this, the result of the spin is shown immediately.

You can also spin the slot machine with the **Auto Start** button, which lets you select the number of consecutive spins to be made automatically. **Auto Start** mode ends when the reels have carried out the number of spins set by the player, or when the player clicks on **Stop**.

**Any winnings are calculated according to the payable which will be explained below.**

### **Wins on the win lines**

All symbols (except for the "Pizza Bonus", "Flour Bonus" and "Pizza Express" symbols) only pay out if they appear consecutively, from left to right, on one or more paylines.

Only the highest win is paid on a single payline, while simultaneous wins on different paylines will add up.

A win resulting from a combination will be calculated as follows: "base bet" x "winning combination multiplier".

### **Wins regardless of the position of the symbol**

Special symbols ("Pizza Bonus", "Flour Bonus" and "Pizza Express" symbols) are winning symbols regardless of where they appear.

These winnings always add to other winnings and may allow the player to participate in "special" games.

## JACKPOT

The jackpot contribution is equal to 1% of the total bet.

4 or 5 Jackpot symbols anywhere on the reels award the base win (Total Bet x50) and access to the Jackpot mode.

A wheel will appear which will be divided into a green segment, representing the chance of entering the Jackpot mode, and a remaining red segment.

If the pointer lands on the green segment, the player will participate in the Jackpot; otherwise, they will be redirected to the normal game.

The chance of entering the Jackpot mode is directly proportional to the Total Bet placed:

chance of entering Jackpot mode = Total Bet / 30.

If the player is allowed to participate in the Jackpot, they will have 10 spins with 3 symbols, but there will be empty slots on the reels as well.

The following points are scored with each spin, when the same symbol appears consecutively from left to right starting from the leftmost reel:

Based on the total score obtained at the end of the 10 Jackpot Spins, the player will be awarded the following prizes:

**Mini Jackpot:** 0 to 199 points

**Medium Jackpot:** 200 to 399 points

**Maxi Jackpot:** 400 to 599 points

**Super Jackpot:** 600 points and above

## RTP

The RTP is equal to 94.65%, excluding Jackpots.

## PROGRESSIVE JACKPOT

The progressive Jackpot is divided with each change—subject to rounding off to the second decimal place—into the four available Jackpots, according to fixed ratios.

If any Jackpot is won, the progressive Jackpot will be reduced by the appropriate amount; therefore, all 4 Jackpots will decrease.

If the Super Jackpot is won, the player will be awarded the entire total prize pool of the Jackpot, and all progressive Jackpots will be reset to 0.

The house has the right to deactivate the Jackpots at any time.

If the Jackpots are disabled:

- The Jackpot mode will no longer be available,
- Throughout the suspension period, collection for the Jackpot will be suspended too, so the Jackpot will not increase,
- All Jackpots will be set to zero,

- When a player opens a session, a notice will automatically be displayed informing them of the suspension,
- A player with an open session will be shown a notice informing them of the suspension and that, from that moment on, no more Jackpots can be won.

In Jackpot mode, the player does not need to make choices; in case of disconnection, the system will complete the Jackpot mode and credit any amounts won.

If the player is not reconnected within 3 minutes, the session will close and the remaining credit will be credited to their gaming account.

The player can, in any case, re-watch the Jackpot mode using the Replay feature.

Internet connection malfunctioning may cause the notification of messages or Jackpot updates to be delayed, but it will not affect winnings.

## **DISCONNECTIONS AND INACTIVITY**

Any disconnections and reconnections are handled as follows:

### **Double connections**

If a player accesses the slot/table game when they are already connected, the first session will be closed.

### **Disconnections and automatic reconnections**

If a player is disconnected, the system carries out several reconnection attempts (during which the reconnection alert is displayed).

If the player is not reconnected after a certain time, the reconnection attempts will cease and the final disconnection alert will be displayed.

### **Session closing if user is disconnected**

When a user disconnects, before closing the session the system:

- **if there are pending choices**, will not close the session immediately in order to allow the user to re-access and finish the round. If the user does not reconnect after 10 minutes, the round of play will be automatically completed according to the game rules; the session will then be closed, and the remaining credit will be transferred to the player's account.
- **if there are no pending choices**, will wait for 3 minutes (2 minutes in the instant version) in order to allow the user to reconnect. After the timeout is reached, the session will be closed and the remaining credit will be transferred to the player's account.

### **Session closing if user is inactive**

Player inactivity is handled as follows:

- **if there are pending choices**, the user will be disconnected and the timeouts described in the paragraph on disconnections and reconnections will apply.
- **if there are no pending choices**, the system will wait for 3 minutes (2 minutes in the instant version), then the session will be closed, and the remaining credit will be transferred to the player's account.

### **Malfunctioning**

When calculating the remaining credit, the situation after the last move that was correctly completed and communicated to the player before the interruption due to malfunctioning occurred is considered

valid. If a malfunction occurs during a bonus choice or a free spin, upon restoration the system will make the choices randomly, determine winnings, close the session, and credit the remaining credit to the player's account.

Any game in progress for more than 35 days will be cancelled, and the corresponding bet will be refunded.

Winnings are paid according to the payout table. Notwithstanding the foregoing, should an upper winning limit be specified, said limit will prevail. However, the upper limit may be unreachable depending on the game's bet configurations.

Some features, such as Buy Bonus, Buy Pass, Fortune Spins, Feature Buy, Turbo and Speed Spins, some other configurable features and additional bets may not be available.
