JACKPOTS

1.4% of every stake goes directly into the jackpots. The jackpots are a combination of contributions by all players plus a base win of your total stake x 800 / 10000. Players playing the maximum stake will be eligible to win the total jackpot. Lower staking players will win a proportion of the total jackpot relative to the stake placed. The amount you are eligible to win will be shown in the jackpot banks. When some or all of a jackpot is won, it is reset to the base win for your stake, plus the current total contributions you are eligible to win. It is not possible for two players to win a jackpot simultaneously. In instances of apparent simultaneous wins, the games are time-stamped and the first player to trigger the win is awarded the jackpot. Subsequent players win the base win for their selected stake, plus any new contributions. There is no ceiling value for the jackpot.

- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 2 hours absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- This includes all settings such as number of lines and bet.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

- Malfunction voids all pays and plays.

The prizes are paid in accordance with the payout table available on the game interface.

Any game in progress for more than 2 hours will be completed and the corresponding prize, if any, will be deposited into the account.
