- This page contains information on how to play this game.
- Please scroll down to read through all topics.

Getting started
- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.

Playing
- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is $ 0.20.
- The maximum bet per round is $ 50.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Win Lines
- This game has 5 reels and 5 win lines.
- Reels are counted from left to right, with 1 being the leftmost, and 5 being the rightmost reel.
- You can find an overview of the win line pattern via "Paytable & Info".

Winnings
- Winning combinations and payouts are made according to the paytable.
- Symbol payout values shown in the paytable are dynamic and change in accordance with the selected bet value.
- All wins start on the leftmost reel and are for combinations of a kind, consecutive from left to right on selected lines, except scatters.
- Scatter symbols pay regardless of their position.
- Highest win only paid on each selected line and per scatter combination.
- Scatter wins and line wins are added.

Bonus Symbols
- Crown (Wild) symbol appears on reels 2, 3 and 4 only.
- The Crown (Wild) symbol expands and substitutes for all symbols except scatters.

- Blue Star (Scatter) symbol appears on reels 1, 3 and 5 only.

RTP Range
- The theoretical RTP (return to player) value for this game is 95.48 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss
- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 2 hours absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- This includes all settings such as number of lines and bet.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.

GAME FEATURES

Jackpots
- The Jackpot Diamonds feature is triggered randomly on any non-winning spin.
- In the Jackpot Diamonds feature, pick cards to uncover Jackpot Gems.
- Once three matching Jackpot Gems have been uncovered, the respective Jackpot is awarded!
- 1.0 % of every stake goes directly into the jackpots.
- Players playing the maximum stake will be eligible to win the total jackpot. Lower staking players will win a proportion of the total jackpot relative to the stake placed.
- The amount you are eligible to win will be shown in the jackpot banks.
- When some or all of a jackpot is won, it is reset to the base win for your stake, plus the current total contributions you are eligible to win.
- Each Jackpot is the sum of its base win plus the contributions from all players to this Jackpot.
- The base win of each Jackpot depends on your stake. The base win is 5000 times your stake for the Diamond Jackpot, 1250 times your stake for the Red Gem Jackpot, 200 times your stake for the Blue Gem Jackpot, and 50 times your stake for the Green Gem Jackpot.

- There is no ceiling value for the jackpots.
- In case this game is withdrawn from our offer, your jackpot contribution will be transferred to other certified games with similar jackpots.
