RETURN TO PLAYER

The odds of getting a particular outcome is always the same at the start of every game. The odds do not vary based on any prior outcome or event such as bet size, balance size, time of day, day of the week, etc. For example, if the top award is won on a given play of the game, the chances of winning the top award on the next play are exactly the same. Likewise, prior losses do not change future odds.

The outcome of any bonus round is predetermined by the server before the player starts playing the round.

Any combination of wins in a single game is limited and will not exceed 250000.00. It may not be possible to reach this limit in a single game from every bet configuration. The theoretical average return to player (RTP) is 95.61%. This RTP represents the long-term expected payback of the game. Malfunction voids all pays and plays.
