GAME RULES

- This page contains information on how to play this game.
- Please scroll down to read through all topics

Getting started

- When you start the game, you enter a lobby where you can choose a machine to play this game. Simply click on 'Play now' or a vacant machine to begin playing!
- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.
- In the lobby, you may see other players in the same game sitting at a machine. By clicking such a machine, you are entering 'spectator mode' and can watch a different player play. You are not able to influence the game which you are spectating in any way.

Playing

- You choose the total bet per round via the 'Total Bet' button.
- The minimum bet per round is $ 0.25.
- The maximum bet per round is $ 100.00.
- The 'Start' button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Win Lines

- Diamond Cash™: Almighty Kraken has 5 reels and 25 win lines.
- You can find an overview of the win line pattern via "Paytable & Info".

Autoplay

- Clicking on "Auto" starts automatic spins.
- If "Autoplay" is activated the button label becomes green. Clicking it again stops the automatic spins.
- Autoplay stops automatically when the total bet is higher than your current funds.
- Autoplay stops automatically when a feature is awarded.

Winnings

- Winning combinations and payouts are made according to the paytable.
- Symbol payout values shown in the paytable are dynamic and change in accordance with the selected bet value.
- All wins start on the leftmost reel and are for combinations of a kind, consecutive from left to right on selected lines, except scatters.
- Highest win only paid on each selected line and per scatter combination.
- Scatter wins and line wins are added.
- Reels are counted from left to right, with 1 being the leftmost, and 5 being the rightmost reel.
- Scatter symbols pay regardless of their position.

Bonus Symbols

- The Wild symbol substitutes for all symbols except for Scatter symbols to help complete winning combinations.
- The Wild symbol acts as a Multiplier on the win line in the Wild Spin, Sticky Spin and Colossal Spin Features.
- 5 Diamond symbols appearing anywhere on the reels trigger a re-spin with all Diamond symbols locked in place.
- 6 or more Diamond symbols appearing anywhere on the reels trigger the Diamond Cash™ Feature.
- Blue/Pink/Wild/Sticky/Colossal/Major/Minor/Mini Diamond symbols are different representations of the Diamond symbol and substitute for it.
- Cannon only appears in the base game.
- The possible prize values that can be displayed on the Diamond symbol are 1, 2, 3, 4, 5, 15, 20 or 100 multiplied by the Total Bet.

RTP Range

- The theoretical RTP (return to player) value for this game is 95.00 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 2 hours absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- This includes all settings such as number of lines and bet.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.

The prizes are paid in accordance with the payout table available on the game interface.
Any game in progress for more than 2 hours will be completed and the corresponding prize, if any, will be deposited into the account.

- Each spin in this feature results in a winning combination.
- The Colossal Spin Feature cannot be re-triggered.
- Colossal Spin Feature winnings (after the last spin) will be added to the total Diamond Cash™ Feature win.

Jackpots

- 1.0 % of every stake goes directly into the jackpots.
- Players playing the maximum stake will be eligible to win the total jackpot. Lower staking players will win a proportion of the total jackpot relative to the stake placed.
- Each progressive jackpot is a prize pool exclusively containing the accumulation of all respective player contributions.
- For each prize combination (progressive and base win prize), the game displays the potential win value equal to the sum of the available progressive jackpot on the current stake plus the base win prize.
- When a progressive jackpot is won, the respective winnings are taken from the progressive jackpot prize pool and awarded to the winning player.
- Any remaining winnings are available for subsequent progressive wins, plus any new contributions.
- The amount you are eligible to win will be shown in the jackpot banks.
- It is not possible for two players to win a jackpot simultaneously. In instances of apparent simultaneous wins, the games are time-stamped and the first player to trigger the win is awarded the jackpot.
- There is no ceiling value for the jackpots.
- In case this game is withdrawn from our offer, your jackpot contribution will be transferred to other certified games with similar jackpots.

Gambling

- With your current stake, a maximum of $ 500.00 can be bet while gambling.
- Gambling is not possible for higher wins.
- During autoplay gambling is not possible.
- Gambling is not possible after a jackpot win.
- Any base game wins that coincide with a Diamond Cash™ Feature trigger are part of the feature game win and cannot be gambled.
