FREE SPINS BONUS

Free Spins Scatters on reels 1, 3, & 5 will award the Free Spins bonus. The bet for the Free Spins bonus will be set at the value that the Free Spins bonus was triggered.

When the bonus is triggered, you will have the opportunity to gamble to move to a better prize level. The chance of you winning the gamble will be presented as a coloured area on the arrow on the screen. Winning the gamble will move you up to the next better prize level; losing will move you down to the previous prize level. Losing the gamble on the first prize level will end the bonus. You cannot gamble on the last prize level.

Press GAMBLE to gamble; press TAKE BONUS to start the bonus on the current prize level. This will take you to the Pyramid Pick round.

In the Pyramid Pick round, select 1 block from each row, starting with the bottom row.

Selecting a block will reveal 1 of the following:

- A number of Free Spins.
- A Free Spins win multiplier - every Free Spins win will be multiplied by this.
- A symbol - this symbol will appear super stacked on the reels.
- X - ends the picks and begins Free Spins.

The top prizes in the Pyramid Pick will be determined by the player's progress in the BONUS↑UP feature.

If you have the DOUBLE BONUS BET active, you will be given a choice of doubling the number of Free Spins you have won or doubling your win multiplier during Free Spins.

In Free Spins, Scatters on reels 1 & 3 will award 5-10 extra Free Spins. The player will pick a Scatter to determine how many spins are won.

EXTRA BETS

There are 2 extra bets available:

- EXTRA BONUS BET: increases your chance of triggering Free Spins.
- DOUBLE BONUS BET: Doubles the number of Free Spins you win or your win multiplier during Free Spins.

Switching on either or both of these bets will increase your bet. They do not affect the game RTP.

HOW TO CALCULATE A WIN WITH 1024 WAYS

If any of the reels contain more than 1 instance of the symbols, the win will be multiplied. Multiply the number of symbols on each of the reels to get the final payout multiplier.

For example, if the first column contains 2 symbols, second column 3 symbols and third column 2 symbols, the payable value is multiplied by $2*3*2=12$.

Only the highest win per way is paid.

GAME OPTIONS MENU

The game options menu (opened via the button with 3 horizontal lines) contains:

- Sound – To disable/enable game sounds
- Paytable – Displays the payouts for each symbol and description of the game features
- Space to Spin – Available on PC only, if enabled the player can press space to spin
- History – To see game history
