Winning the *MegaJackpots* Progressive

Every bet offers a chance to win the ***MegaJackpots*** progressive. The higher the bet, the better the odds of winning.

Win the Jackpot if 5 ***MegaJackpots*** scatter symbols appear anywhere on the reels on any base game spin or on any free spin in the Free Spins Bonus.

After every spin that doesn't award the Jackpot, a behind-the-scenes Second Chance drawing occurs that can also award the ***MegaJackpots*** progressive.

MegaJackpots progressive seed amount is 500,000\$. 0.5% of the player's total bet is collected and added to this amount. An additional 3% of this bet is collected and retained as a contribution to the next progressive seed stage fund. When the progressive is won, the prize fund is reset to its seed amount.

The odds of winning the Jackpot are exactly proportional to the actual bet amount. Therefore, the game is completely fair, offering the same odds per amount bet per currency.

For example, a player playing at a 0.20 coin value has twice the chance of winning the Jackpot as a player playing at a 0.10 coin value in the same game and currency. The expected return to player is the same for both players.

MultiWay Xtra Feature

With the **MultiWay Xtra** feature, there are 720 ways to win on every spin. **MultiWay Xtra** wins pay for matching symbols in any position in adjacent columns, starting from the leftmost column or the rightmost column. More than one matching symbol in the same column multiplies win. The Wild symbol substitutes for all symbols except for the Scatter and Bonus symbols. Only the highest paying **MultiWay Xtra** win for each symbol is paid per spin.

Example of a **MultiWay Xtra** payout:

The following diagram shows a sample reel outcome using the Necklace symbol. Because there is at least one Necklace or Wild symbol in each of the first four columns, the player has won the 4 Necklace **MultiWay Xtra** win which pays 30 coins per way.

Payout example: 1 x 2 x 3 x 1 Necklace → **6** winning ways:

Column 1	Column 2	Column 3	Column 4	Column 5
		Wild	Necklace	
Necklace		Wild		
	Wild	Wild		
	Wild			

1 Necklace **2** Necklace **3** Necklace **1** Necklace

To determine the payout for this combination:

1. Count the number of Necklace and Wild symbols in each column.
2. Calculate the total number of winning ways ($1 \times 2 \times 3 \times 1 = 6$).
3. Multiply the number of ways by the 4 Necklace symbol win ($6 \times 30 = 180$). The pay is 180 coins won.

The actual amount won in currency is based on the coin value.

Free Spins Bonus

The **Free Spins Bonus** is triggered by getting a Bonus scatter symbol in any position on five consecutive reels.

Each winning combination of five Bonus symbols pays a special win and awards 8 free spins (See payable for details). Since there are Stacked Bonus symbols, it is possible to earn up to 96 initial free spins.

The reels in the **Free Spins Bonus** have a richer, more plentiful **Stacked Wilds** feature than the base game reels.

Retrigger the Free Spins Bonus, by getting a Bonus symbol in any position on five consecutive reels. Each winning combination of five Bonus symbols pays a win and awards 8 additional free spins (See the payable for details). The bonus can be retriggered multiple times, up to a maximum of 240 free spins per bonus.

Free spins are played at same coin value as the triggering spin.

win occurs. Potentially, the awarded Jackpot could be somewhat higher because of display delays. The Jackpot paid may also be higher due to meter smoothing, when some meter growth from peak times may be spread across slower periods. In an exceptionally rare case, the award value could be the Jackpot seed amount if the Jackpot winning outcome occurred just after another player's Jackpot win but before the Jackpot meter was able to reset due to this earlier winner.

All applicable taxes and fees in connection with any winnings awarded to the player, and any other payments to the winning player are his/her sole responsibility. Winnings cannot be transferred, substituted, or redeemed for any other consideration.

The casino may deactivate this game at any time. If the casino decides to continue the game after a Jackpot is won, the casino is under no obligation to re-seed the Jackpot with the amount of the previous seed or any other amount. In the event that the casino decides to terminate the game, or the game becomes permanently unavailable due to unforeseeable circumstances, the casino holds any funds shown in the Jackpot meter. The casino may increase or decrease the size of the Jackpot award by contributing or removing money at any time.

Jackpot represents an increasing top award where the growth is funded by a fixed percentage of each bet placed by all players playing for the jackpot.

In some jurisdictions, regardless of bet size, there is an award cap on any single transaction, excluding the **MegaJackpots** progressive. See the payable for details. A transaction includes the results of the *Free Spins Bonus* plus the outcome which launched the bonus. If the award cap is reached in the bonus, the bonus ends immediately, even if there are remaining free spins.

Expected Payback

In accordance with fair gaming practices required in most legal jurisdictions worldwide, each and every game outcome is completely independent. The odds of getting any particular outcome are always the same.

The odds do not vary based on prior outcomes, bet size (except for the jackpot), balance size, time of day, day of week, etc. For example, if the top award is won on a given play of the game, the chances of winning the top award on the next play are exactly the same. Likewise, prior losses do not change future odds.

The expected payback reflects the theoretical return across a very large number of plays by numerous players over an extended period of time. For this game type, the long-term base game theoretically expected payback (i.e. excluding progressive contributions) is 88.99%. The results for any given player over a play session can vary widely from this long-term, expected average in either direction. The fewer the number of games played, the wider the normal variance of actual payback that may be experienced.
