SPECIAL SYMBOLS AND FEATURES

CHAIN REACTION

Symbols forming wins disappear, making way for new symbols to drop in that may form new wins.

EMPIRE EXPAND

Each reel has 6 symbol positions, but only the bottom 3 rows are active at the start of each spin. Forming a win activates the next inactive row from bottom to top for the following chain reactions, increasing the number of possible win ways. At the start of each spin the active rows are reset to the initial 3.

WILD

WILDS substitute for all paying symbols. WILDS, including those unlocked by completing a stage in the Emperor's Rule, appear on reel 3 until the last stage of the Emperor's Rule is completed, and on reels 3 and 4 after that.

EMPEROR'S RULE

A progress bar with 4 stages is placed over the 6th reel. Landing the highest paying symbol (Precious Gem) on the active rows fills the progress bar. Landing 100 symbols is required to complete each stage of the progress.

Completing each stage of the Emperor's Rule adds new symbol types and features to the reels as follows:

- Stage 1: Emperor WILD (Purple)
- Stage 2: High Emperor WILD (Green)
- Stage 3: Great Emperor WILD (Pink)
- Stage 4: FREE SPINS

After stage 4 of the Emperor's Rule is completed, the progress bar is removed and the 6th reel is unlocked.

EMPEROR WILD

The Emperor WILD expands over all active rows on a reel. It does not disappear after taking part in a win until all 6 rows of the reels are activated. The Emperor WILD counts for as many symbols as the current number of active rows when it participates in a winning combination.

HIGH EMPEROR WILD

The High Emperor WILD acts the same as the Emperor WILD, but also holds a random win MULTIPLIER of between x2, x3, x5 or x10. The MULTIPLIER is applied to all wins in which the High Emperor WILD participates.

GREAT EMPEROR WILD

The Great Emperor WILD acts the same as the High Emperor WILD and disappears after taking part in up to 3 consecutive wins after all 6 rows of the reels are activated.

FREE SPINS

FREE SPINS scatters are added to reels 1, 2, 5 and 6 after completing the last stage of the Emperor's Rule. Landing 4 FREE SPINS scatters in a spin triggers 10 FREE SPINS. Landing 4 FREE SPINS symbols in FREE SPINS awards 10 additional spins. FREE SPINS are played with all 6 rows activated.

MAX WIN

The maximum win amount is limited to 20,000x your current stake. If the total win of a game round reaches 20,000x the round immediately ends, the maximum win is awarded, and any remaining FREE SPINS are forfeited.

HOW TO PLAY EMPEROR OF INDIA

Game Progress

Any progress features in the game, including symbols locked onto the reels which affect subsequent spins, are saved for your game at the stake level you are playing at.

You can have different progress levels at different stakes on the same game, and move between them by changing the stake.

If you are awarded free spins from a promotional campaign any progress in the main game including any locked symbols, will be saved and be available to continue playing at the same stake once the free spins have been completed.

Please note that this stateful game saves its state forever.

Total Stake

The Total Stake is the total of stakes per line. You can adjust it at any time, using the + or – buttons.

Spin the Reels

If you are playing on desktop, click the Spin button or press the spacebar to spin.

Autoplay

Press the AUTO button to commence automatic play of the game at the currently selected stake. Select how many spins to play via the Total Spins Dropdown menu.

More Autoplay settings

Select the loss limit: The Autoplay will stop at the last spin before the loss limit is reached. The Autoplay loss limit should be higher than your stake.

Expand the AUTOPLAY dialog by choosing MORE AUTOPLAY SETTINGS. Here you can select additional criteria for the AUTOPLAY stop including - Stop if single win exceeds certain amount; Stop on Bonus Feature.

General types of games

Check the pays menu in the game paytable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

The prize value from one payline is equal to the total stake divided by the number of paylines, multiplied by the symbol multiplier advertised in the paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

Example: Total stake is 2. Total paylines are 20. Symbol multiplier for length of 5 is 300. The win for 1 payline with this symbol and length would be calculated as such: $2 / 20 * 300 = 30$.

The prize value from one payline in a Multiline game is equal to the stake multiplied by the symbol multiplier advertised in the paytable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid.

Example: Stake is 2. Symbol multiplier for length of 5 is 20. The win for 1 payline with this symbol and length would be calculated as such: $2 * 20 = 40$.

The prize value from one way or cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the paytable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

If more than one win occurs on the same way or cluster, the largest win is paid.

Example: Total stake = 2. Symbol win multiplier = 2. Win = $2 \times 2 = 4$.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

If you are playing a Scatter Pays game only the highest winning combination is paid per symbol.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.

In case of an incomplete game round due to connection loss where the result has not yet occurred, the game will generate an outcome for the round, which will be shown upon restoring of connection and the result will be visible in the Game History after refreshing the game.

In case of an incomplete game round due to connection loss where the result has occurred, but the player could not be informed of this fact, the game will inform the player of the outcome upon refreshing of the game and the result will be visible in the Game History.

WITH PROGRESSIVES

Jackpot Game

Win one of the offered jackpot tiers when three or more jackpot symbols appear on the reels or the jackpot is triggered by a game feature. Spin the jackpot wheel to determine which of the offered jackpot tiers will be won. The size of the segments on the jackpot wheel do not correlate to the odds of winning each jackpot tier represented. The chances of winning a jackpot increase in correlation with the size of the stake played. The jackpot is triggered randomly and can be won by playing any of the linked jackpot games. To win the jackpot, the player is not required to make any decision other than to spin the reels. The stake value cannot be changed during free spins. Internet connectivity issues may cause delays in jackpot messages or updates, but they do not affect actual jackpot wins. It is not possible for two players to win the same jackpot. In the event two jackpot winnings occur close to one another the jackpot will be assigned in their respective order. Due to connectivity issues the jackpot value displayed may differ from the effective jackpot value. The jackpot could be temporary deactivated, when this occurs all contributions are paused. The jackpot amount available upon reactivation will be the same as before the deactivation.

Progressive Jackpot

The progressive jackpot is accumulated by all stakes on games offering these jackpots and, in some cases, the jackpots may be offered on multiple websites. A percentage of each total bet is added to a common pot. Part of this contribution is used to form the progressively increasing jackpot amounts, and the other part, contributes to a seed fund, which is the minimum amount of money guaranteed to be made available to players after a jackpot is won by qualifying players. Once the jackpot has been won, a new progressive jackpot will be made available and the process repeats. The jackpot can be triggered and won by a single spin from a single user only. This jackpot does not have a ceiling value and can be won at any time. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

Time Jackpot

The time jackpot is a progressive jackpot which is guaranteed to pay out before a set date and time. The prize pot grows with the contributions from the stake of each spin on a jackpot game, and the closer the prize pot gets to the advertised guaranteed latest payout time, the greater the odds of winning it.

Odds increase up to 100% when the guaranteed latest payout time is reached. Once the jackpot has been won, a new time jackpot will be made available and the process repeats with a new deadline for the next guaranteed payout. The jackpot can be triggered and won by a single spin from a single user only. This jackpot does not have a ceiling but must be won before the date and time specified. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

Dynamic Jackpot Allocation

Only the first \$2 of a stake is eligible to win the time jackpot.

Stake amounts in excess of \$2 are contributed directly to the progressive jackpot.

Daily Drop (time)

Current starting value is: \$200, Next minimum starting value is: \$200

Super Drop (progressive)
