Tumbling Reels Feature

On any winning symbol combination:

1. All winning symbol combinations are evaluated, and values are added to the win meter.
2. All symbols in winning combinations disappear.
3. Empty spaces are filled as symbols tumble from above, in sequence.
4. The reels are evaluated again for winning symbol combinations and values are added to the win meter.
5. Tumbles continue until no winning symbol combinations appear.

Spirit Meter

During normal base and bonus game spins the *Spirit Meter* is increased by 1, up to a maximum of 5.

Fill the meter with 3 or more spirits to trigger the *Feature Wilds* spins.

Every *Feature Wilds* spin decreases the *Spirit Meter* by 1.

The meter is reset at the start of every new spin.

Feature Wilds

Feature Wilds spins are triggered when 3 or more spirits fill the *Spirit Meter* at the end of a spin.

One *Feature Wilds* spin is awarded for the first 3 spirits, plus one *Feature Wilds* spin for every additional spirit.

1 of 3 features is chosen at random to enhance all awarded spins.

During the base game, the *Feature Wilds* spins are played on subsequent paid spins.

During the *Pixie Queen's Free Spin Bonus*, the *Feature Wild* spins do not decrement the spins remaining.

Feature Wilds	Description
<i>Wild Reels</i>	Randomly 1 of the 3 centre reels, or reels 2 and 4, or reels 3 and 4 may be turned wild for the duration of this spin.

	The wilds on the chosen reels do not disappear when involved in a win.
<i>Random Wilds</i>	3 wilds are randomly placed on the second, third, and/or fourth reel. After the reels have tumbled and there are no more wins, a new set of wilds may be randomly placed. This can happen up to 2 more times. These wilds disappear when involved in a win.
<i>Countdown Sticky Wilds</i>	3 wilds are randomly placed on the second, third, and/or fourth reel and remain locked for three tumbles. After 3 tumbles have completed, the <i>Countdown Sticky Wilds</i> disappear. <i>Countdown Sticky Wilds</i> involved in a win do not disappear.

Mystery Bonus Trigger

At the start of any base game *Feature Wilds* spin, the wilds can turn into Bonus symbols and trigger the *Pixie Queen's Free Spin Bonus*.
The game continues as normal, with the Bonus symbols turning back to wilds when returning from the bonus.

Mystery Jackpot Trigger

At the start of any base or bonus game *Feature Wilds* spin, the wilds can turn into Jackpot symbols and trigger the *Pixie Progressive Picker*.
The game continues as normal with the Jackpot symbols turning back to wilds when returning from the picker.

Both *Mystery Bonus Trigger* and *Mystery Jackpot Trigger* can occur on the same *Feature Wilds* spin.

Pixie Queen's Free Spin Bonus

Three Bonus symbols anywhere on reels 1, 2, and 3 trigger the *Pixie Queen's Free Spin Bonus*.

The *Pixie Queen's Free Spin Bonus* can also be triggered by the base game's *Feature Wilds* spins' *Mystery Bonus Trigger*.

Once the *Pixie Queen's Free Spin Bonus* is triggered, pick one of the Bonus symbols to reveal the awarded free spin count and earn 5 to 11 free spins.

The *Pixie Queen's Free Spin Bonus* is played automatically. The reels are made richer by adding wilds to the first reel and all Pixie symbols on the first reel pay double when involved in a win.

A non-wild symbol must be part of any winning combination.

For example, the following outcome on a payline pays the award for five Ace symbols:
Wild – Wild – Wild – Wild – Ace

If the non-wild symbol is Jackpot symbol, then the Wild symbol combination pays as a Logo symbol combination.

For example, the following outcome on a payline pays the award of four Logo symbols:
Wild - Wild - Wild - Wild - Jackpot

Bonus play continues until all free spins have been played.

The maximum number of *Feature Wilds* is increased to 18.

Feature Wilds do not decrease the remaining spins in the bonus.

The Pixie Queen may award a gift of an *Extra Spin* (up to a maximum of 180 total free spins within any bonus round).

The bonus cannot be retrIGGERED.

Reels used in the *Pixie Queen's Free Spin Bonus* are different from the reels used in the base game.

Free spins are played at the same coin value and same number of paylines as the triggering spin.

Pixie Queen's Multiplier

During the *Pixie Queen's Free Spin Bonus*, a line win is multiplied by 2x when a Pixie symbol containing a 2x multiplier appears in the line win.

The wild symbol does not substitute for 2x multipliers.

Multipliers only appear on Pixie symbols on reel 1.

Pixie Queen's Gifts

During normal bonus spins, if a spin doesn't trigger a *Feature Wilds* spin, there is a chance the Pixie Queen may award a *Pixie Queen's Gift* that triggers enough tumbles to award the *Feature Wilds* spins. There are three different types of *Pixie Queen's Gifts* that can occur.

<i>Pixie Queen's Gift</i>	Description
<i>Spirit Boost</i>	The Pixie Queen awards 2 spirits in addition to the spirits already earned. If 3 or more spirits have already been awarded, the <i>Feature Wilds</i> spin triggers on the next spin.
<i>Symbol Elimination</i>	The Pixie Queen removes each visible instance of 1 to 4 symbol types, triggering a new tumble and increasing the <i>Spirit Meter</i> by 1. If

	the <i>Spirit Meter</i> has filled with 3 or more spirits at the end of the spin, the <i>Feature Wilds</i> spin triggers on the next spin.
<i>Extra Spin</i>	The Pixie Queen awards another free spin.

Pixie Progressive Picker

The *Pixie Progressive Picker* is triggered when 3 Jackpot symbols appear on reels 3, 4, and 5 during a normal spin in the base game or the *Pixie Queen's Free Spin Bonus*. The *Pixie Progressive Picker* can also be triggered by the base or bonus game's *Feature Wilds* spins' *Mystery Jackpot Trigger*.

Pick a Pixie to fill one orb of the Gold, Silver, or Bronze Jackpot meter. Continue selecting pixies until a jackpot meter's 4 orbs have all been filled to win that respective award. The player's choice of pixies does not affect the outcome.

The Gold Jackpot is a shared progressive jackpot. The growth is funded by a fixed percentage of each bet placed by all players playing for that jackpot.

The odds of winning each of the shared jackpot are proportional to the amount wagered.

For example, a player playing at a 0.20 coin value has twice the chance of winning the Gold Jackpot as a player playing at a 0.10 coin value in the same currency. The expected return to player is the same for both players. Therefore, the game is completely fair, offering the same odds per amount bet per currency.

The Bronze and Silver Jackpots are a fixed award, proportional to the amount wagered, and are not shared – they are only winnable by the player.

After a jackpot is awarded the *Pixie Progressive Picker* returns to the triggering spin.

Rules

Misuse or malfunction voids all pays and plays.

All line win symbols must appear on a played line and on consecutive reels, beginning with the far left reel.

Only the highest winner is paid on each payline. Line wins are multiplied by the coin value on the winning line. Coinciding line wins on different paylines are added.

Bonus wins are independent from line wins and are added to the total amount paid.

Bonus symbol appears on reels 1, 2, and 3 in the base game only.

Jackpot symbol appears on reels 3, 4, and 5 in both the base game and the bonus game.

Bonus symbol and Jackpot symbol do not appear on the reels during *Feature Wilds* spins.

Wild symbol appears on reels 2, 3, and 4 in the base game.

Wild symbol appears on reels 1, 2, 3, and 4 in the bonus game.

Wild symbol substitutes for all symbols except Bonus symbol and Jackpot symbol.

Wins are shown in currency.

The prizes are paid in accordance with the payout table available on the game interface.

The amount paid for the GOLD Progressive Jackpot is approximately the amount seen on the jackpot meters when the win occurs. Potentially, the awarded jackpot could be somewhat higher because of display delays. In an exceptionally rare case, two players may simultaneously win a jackpot. The order of the winners is determined solely by the timestamp applied to each transaction request as it is received by our servers. The official winning outcome belongs to the player whose transaction timestamp is first. The player whose timestamp is second will win the jackpot Re-Seed Amount if their winning outcome occurred just after the other player's win, but before the meter was able to reset.

In some jurisdictions, regardless of bet size, there is an award cap on any single transaction, excluding the Gold jackpot progressive. See the paytable for details. A transaction including the results of any triggered bonus, plus the outcome which launched the bonus. If the award cap is reached in the bonus, the bonus ends immediately, even if there are remaining free spins.

Any game in progress for more than 30 days will be cancelled, and the corresponding bet will be refunded.

Additional Information

Expected Payback

In accordance with fair gaming practices required in most legal jurisdictions worldwide, each and every game outcome is completely independent, except in cases where one spin unlocks a feature for a subsequent spin or series of spins, per the game rules. The odds of getting any particular outcome are always the same.

The odds do not vary based on prior outcomes, bet size, balance size, time of day, day of week, etc. For example, if the top award is won on a given spin of the game, the chances of winning the top award on the next spin are exactly the same. Likewise, prior losses do not change future odds.

The expected payback reflects the theoretical return across a very large number of spins by numerous players over an extended period of time.

The expected payback includes the positive effect of the jackpots. The larger the jackpots, the larger the expected return.

At reset the progressive jackpot is \$1,500 and the expected return is 96.27%.

Example jackpots:
\$2,589.00
\$3,678.00

Long-term expected return:
96.57%
96.87%

The results for any given player over a play session can vary widely from this long-term, expected average in either direction. The fewer the number of games played, the wider the normal variance of actual payback that may be experienced.
