

CHILI BOMBA™

GAME RULES

- This page contains information on how to play this game.
- Please scroll down to read through all topics.

Getting started

- When you start the game, you enter a lobby where you can choose a machine to play this game. Simply click on "Play now" or a vacant machine to begin playing!
- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.
- Within the lobby, you may recognize other players in the same game by a person sitting at a machine. By clicking such a machine, you are entering "spectator mode" and can watch a different player play. You are not able to influence the game which you are spectating in any way.
- Please choose the amount that you would like to take with you into the game directly after entering it.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is \$ 0.20.
- The maximum bet per round is \$ 20.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Win Lines

- This game has 6 reels and symbols can appear in any active position on each reel to contribute to a win.
- Chili Bomba™ has between 729 and 262 144 ways to win.
- You can find more information on winlines via "Paytable & Info".

Autoplay

- Clicking on "Auto" starts automatic spins.
- If "Autoplay" is activated the button label becomes green. Clicking it again stops the automatic spins.
- Autoplay stops automatically when the total bet is higher than your current funds.
- Autoplay stops automatically when a feature is awarded.

Winnings

- Winning combinations and payouts are made according to the paytable.
- Symbol payout values shown in the paytable are dynamic and change in accordance with the selected bet value.
- All prizes are for combinations of a kind, consecutive from left to right on active win ways.
- Scatter symbols pay regardless of their position.
- Highest win only paid on each selected line and per scatter combination. Scatter wins and line wins are added.
- Reels are counted from left to right, with 1 being the leftmost, and 6 being the rightmost reel.
- If the combination on the reels results in a win, all the symbols that were part of the winning combination will explode and new symbols will replace the former symbols on the reels. This is referred to as a Tumbling step.
- The number of tumbling steps is limited to 40 or by reaching a total round win above \$ 5 000.00.

Bonus Symbols

- The WILD symbol substitutes for all symbols except for scatter and CHILI symbols to help complete winning combinations.
- 3 or more Scatter symbols appearing anywhere trigger the Free Spins feature.
- CHILI symbols award more ways to win.

RTP Range

- The theoretical RTP (return to player) value for this game is 95.20 %.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will complete the current round of play.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.

The prizes are paid in accordance with the payout table available on the game interface. Any game in progress for more than 2 hours will be completed and the corresponding prize, if any, will be deposited into the account.

GAME FEATURES

Bonus Ways

- Each game begins with 3 active positions on each reel.
