

Game Objective

Crazy Coin Flip is a unique fusion of the slots and live gaming experience, blending the best of both into one exciting game.

Crazy Coin Flip features three game phases – Qualification, Top Up and Coin Flip Bonus round. To enjoy the Coin Flip Bonus round, players must qualify by spinning the Qualification slot and collecting three scatter symbols.

Additionally, players have an option to boost their multipliers in Top Up before heading to the Coin Flip Bonus round for the chance to collect the big win.

Game Rules

The game features three phases:

- Qualification
- Top Up
- Coin Flip Bonus round

Qualification

When you join the game, it begins with qualification which is played using a five-reel, three-row slot with 10 fixed winlines, one scatter symbol and seven paying symbols.

The goal is to land three scatter symbols in one spin to qualify for the Coin Flip Bonus round. The scatter symbols may be with or without multipliers. Once you have successfully qualified, all scatter multipliers are added together and used in the Coin Flip Bonus round to calculate the final multipliers. Scatter symbol multiplier values range up to 10x.

You may still get payouts for winning combinations which are paid out according to the pay table.

View the pay table and winline info at any time by simply clicking/tapping the information icon or in Help.

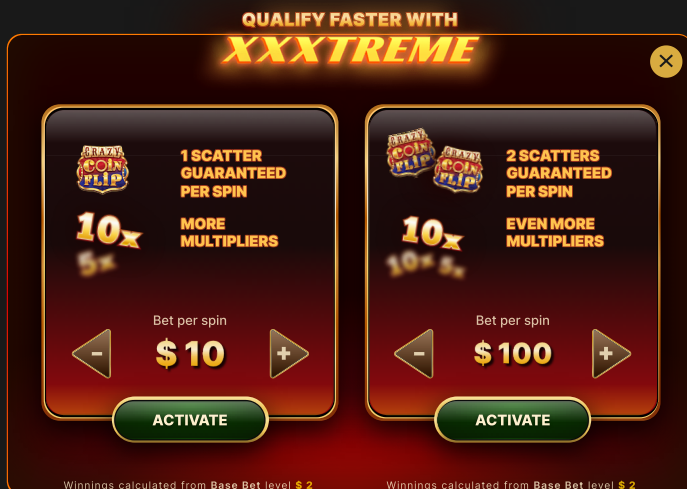

The Qualification slot has three spin modes:

- Normal spin (set by default)
- XXXtreme Spin
- Super XXXtreme Spin

To spin the Qualification slot, select your bet amount and click/tap SPIN.

- The bet selected in Normal mode becomes your base bet and will be used for calculating your winnings.
- Activating any of the two XXXtreme spin modes will help you to qualify faster by guaranteeing one or two scatter symbols each spin at the cost of an increased spin bet amount.
- Activating XXXtreme spin mode costs five times your base bet for one guaranteed scatter symbol and increases the chance of getting scatter multipliers.
- Activating Super XXXtreme spins costs 50 times the base bet for two guaranteed scatter symbols and increases the chance of getting multipliers even more.
- Your payouts will be calculated using the base bet.

Top Up

After you have qualified for the Coin Flip Bonus round and wait for it to begin, spin the Top Up slot for an extra cost to boost your multipliers.

The Top Up phase features a three-reel, three-row slot, with red and blue coin symbols having various multiplier values. To get the extra multipliers, collect three same-coloured coin symbols in the middle row.

To spin the Top Up slot, the minimum Top Up bet amount equals the bet you qualified with (base bet) and the values displayed on the coin symbols are the initial multipliers. The initial multipliers on each coin symbol range from 1x up to 50x.

By choosing to increase your Top Up bet amount, you will also increase the value of multipliers on the coin symbols.

If you collect three same-coloured coin symbols in the middle row, the values of the acquired multipliers are then summed together and added to the total Top Up multiplier for the corresponding coin colour.

Once the time runs out the player is transferred to the Coin Flip Bonus round.

If you join the Top Up phase a certain time before the Coin Flip Bonus round is about to begin, a pop-up message will appear on the screen.

COIN FLIP BONUS ROUND BEGINS!

BONUS

TOP UP

Click/tap BONUS to join the Coin Flip Bonus or TOP UP to stay in Top Up and wait for the next bonus round.

If no decision is made, you will be transferred to the Coin Flip Bonus round automatically.

Coin Flip Bonus round

Once the Coin Flip Bonus round starts, sit back and enjoy a show led by a game host. The Coin Flip multiplier for each coin side will be randomly generated to contribute to your total winnings. Coin Flip multiplier values range from 5x up to 100x. These multipliers will be common for all players.

After receiving the Coin Flip multipliers, all multipliers (Scatter multiplier, Top Up multipliers and Coin Flip multipliers), will be calculated together and displayed as final multipliers separately on the blue and red side of the coin.

The game host then pulls a Coin Flip machine lever to flip the coin. After the coin lands, whichever coin side is facing up is considered the Coin Flip Bonus round result and each player will be paid out according to the multiplier on the winning coin side.

Payouts

Qualification slot winlines are paid out immediately, unless the player qualifies. If a player qualifies and gets one or more winlines in the same spin, then the payout for the winlines is processed after the Coin Flip Bonus round.

Qualification slot winlines

The Qualification slot has 10 fixed winlines.

- Winline pay if symbols on them match the pattern in succession from the leftmost reel to the rightmost reel.
- Only the highest win per winline is paid.
- There can be one or more winlines in the same spin. Simultaneous wins on different winlines are added together.

The amount that will be paid out using your base bet is based on the type and count of collected symbols and will be displayed on your screen immediately after the spin.

Coin Flip bonus round payout

The Coin Flip Bonus round payout is calculated based on your base bet and final multiplier on the winning side of the coin.

Your final multiplier is calculated in the following way:

1. Your total Scatter multiplier gets multiplied with Coin Flip multiplier (examples: $8 \times 15x = 120x$, $8 \times 25x = 200x$).

2. Then the total Top Up multipliers get added (examples: $120x + 4x = 124x$, $200x + 12x = 212x$).

3. Now you see the final multiplier on the blue and red coin sides.

When the Coin Flip Bonus round result is determined, the final multiplier on the winning coin side will be multiplied by your base bet amount.

Any winnings from the Qualification slot are then added to the Coin Flip Bonus round payout.

The game has a theoretical payout cap defined and player's Top Up bets are checked against before each Top Up spin. If this Payout cap is reached, certain bet

values might not be available.

MAX PAYOUT \$ 500,000

Return to Player

The optimal theoretical return-to-player (RTP) is 96.05%.
