## Game Recovery:

### Bet Recovery

Due to the nature of the communications medium for the game, the player may experience interruptions, delays or termination to the game play cycle.

In the event of an unexpected interruption/termination of a real play game, the game will recover to the last known state.

If for example, the game was started but not fully completed due to closure of the browser or connectivity problems, this will not affect the final result of the game after the game has recovered, and any winnings will be correctly paid to your account balance, and will be exactly according to the winning or losing result produced prior to the game being prematurely terminated.

Malfunction Voids All Pays and Play.

Any game in progress for more than 35 days will be cancelled, and the corresponding bet will be refunded.
