

Notre Dame

How to play

Choosing your bet

Use the bet '+' and '-' buttons to select your bet.

Winlines are fixed at 20 lines.

Click on 'spin' to start the game.

Wild Win

The Wild symbol substitutes for all symbols except 'Jester's Hat', 'Chest' and 'Bell' symbols.

Jester's Hat Bonus

Three Jester's Hat scatter symbols anywhere in view on reels 2, 4 and 5 awards the Jester's Hat bonus. Pick a hat to reveal a number of free spins. Pick again to reveal your free spins bonus multiplier, then your free spins will start. Further free spins or bonuses cannot be triggered within free spins. Maximum number of free spins is 20 and maximum free spins multiplier is x7.

Bell Bonus

A Bell scatter symbol anywhere in view on reel 3 awards the Bell bonus. The bell will ring and award your prize. Maximum prize is total bet x20.8.

Chest Bonus

Three Chest scatter symbols anywhere in view on reels 1, 3 and 5 awards the Chest bonus. Open the chest to reveal a wheel of fortune. Spin the wheel and win the prize it stops on. Keep spinning and accumulating prizes. When the wheel stops on collect you will win the total prize accumulated. Land on a diamond to win the progressive jackpot plus the bonus winnings so far. Winning the progressive jackpot also ends the Chest bonus. Maximum win is total bet x1000, plus the progressive jackpot.

Rewind

If your spin is a losing one, keep your eye out for a rewind. The reels may wind backwards turning your loss into a win.

Progressive jackpot

The progressive jackpot consists of a fixed minimum amount which gradually increases by a percentage of funds inputted into the game until it is won. When the jackpot is won, it is reset to the seed amount and begins to rise again. The current jackpot total is displayed above the reels.

The jackpot can only be won in the Chest bonus.

Important points to note about Jackpots:

Jackpots are available for the "real play" version of Notre Dame only.

There is no minimum stake amount to qualify for inclusion in a jackpot game.

The seed (or starting value for the Jackpot) is: 20000.11.

Winning a progressive jackpot neither contributes to, or is affected by the daily cumulative winnings limit.

It is not possible for two players to simultaneously win the jackpot: the jackpot is locked when it is being won, this means that no other bets will be accepted for it, so only one player at a time is able to win it; the first player would win the jackpot and the second attempt would be unable to place their stake as the jackpot amount that they are playing for has decreased.

All players contribute 10.8% of each bet placed to the progressive with every spin of the reels. The progressive jackpot can only be won in the Chest bonus round. All players are eligible to win the progressive jackpot on every game.

RULES

Line wins are multiplied by the value bet on the winning line.

All non-scatter wins must appear on a valid winline and on consecutive reels, beginning with the far left reel.

Only the highest line win is paid on each line.

All valid line wins in view are added together and paid.

Bonus symbols are scatter wins and are awarded in any position on the reels specified.

Multiple scatter bonuses can be won in a single game.

Scatter symbols trigger bonuses in addition to line wins.

Free Spins are played at the same number of lines and bet per line as the triggering game.

All players are eligible to win the progressive jackpot on every game. The progressive jackpot is funded by a fixed percentage contribution from every bet placed and is specific to this game.

If a player wins the progressive, but, due to a communication error, this win has not yet been displayed on the player screen, the progressive amount won will automatically be transferred to the player's Espacejeux account.

In the event of the progressive jackpot being won, other players playing the game will be informed of the new jackpot value and offered the option to void the present bet. This is only relevant if the jackpot display on the other players' games has not been updated to this new value yet.

In the event a progressive seems to have been won by multiple players simultaneously, should there be a discrepancy between the progressive amount displayed on the players' screens and the amount recorded in Loto-Québec's computer system, the latter shall prevail.

The maximum win on any transaction is capped and the level of that cap is shown on the final page of the in-game payable. A transaction includes the combined results of all spins and bonuses awarded.

Should you get disconnected during play we strongly recommend that on reconnection you re-launch the game and ensure any outstanding transactions are completed.

Minimum and maximum bets vary depending on currency. To determine the parameters of the game, use the '+' and '-' buttons to increase/decrease the bet. You will not be able to go beyond the minimum and maximum limits. You are not committed to any bet until you press 'Spin'.

The prizes are paid in accordance with the payout table available on the game interface.

The theoretical average return to player (RTP) is 92.90%. This RTP represents the long-term expected payback of the game which has been calculated by an independent testing company.

Malfunction Voids all pays & plays.
