

Gold Cash

Introduction

Gold Cash is a 40 win line, 5x4 reel slot game featuring stacked wild symbols, Scatter symbols, a gamble feature and also Spin Chance!

How to Play

Spin the reels by pressing the 'SPIN' button to try to achieve 3, 4 or 5 of a kind reel wins.

Select the 'CHANGE STAKE' button to increase or decrease the size of the bet.

Autoplay

Press the 'AUTOPLAY' button to see the options. You must select the number of autoplay games, and your loss limit, before you have the option of starting the autoplay.

'Custom Loss Limit' refers to how much money you wish to lose before the auto play stops. For example, if you have \$50 in your balance, and you choose a \$20 loss limit, the auto play will stop as soon as your balance goes below \$30, even if you have auto play games remaining.

You can either choose to accept the suggested loss limit, which is your stake multiplied by the number of autoplay games you have selected, or manually type in a loss limit by pressing the 'Custom Loss Limit' button.

Choose the 'More settings' option if you wish to stop the autoplay when you win over a certain amount.

Select the 'AUTOPLAY' button during autoplays to stop them.

Game Rules

All games are played with 40 win lines.

Wins can occur across any or all of the win lines.

Only the highest award is paid per winning combination.

All wins, except SCATTER, pay left to right across adjacent reels.

SCATTER symbols pay per amount in view on the reels, regardless of win lines.

Your winnings will be credited to your account immediately.

You will lose your bet amount if you lose the game.

Features

Gamble

Any win that is equal to or greater than the current bet will offer the gamble feature.

Press the 'GAMBLE' button during the feature to gamble your winnings and stop the dapple.

Press the 'COLLECT' button during the feature to collect your winnings.

The dapple can stop on a win value that is either higher or lower than the current win.

The win value that the dapple stops on becomes the new current win.

The player can gamble multiple times until they reach either the bottom or the top of the ladder, which will then automatically collect and/or end the gamble feature.

The win values are awarded in the currency displayed in the credit meter.

Spin Chance

Spin Chance is triggered automatically if the credit is reduced below the current price of play, yet is still greater than zero.

Spin Chance offers the player an opportunity to wager their remaining credit in an attempt at winning an additional spin at the current bet.

To play Spin Chance, select the 'PLAY' button to begin moving the pointer across the meter.

Alternatively, select the 'NO THANKS' button to exit Spin Chance with the remaining credit.

If the pointer stops on the green segment, a spin at the current bet is awarded and plays automatically.

If the pointer stops on the red segment, the player loses any remaining credit and exits to the base game.

The red and green segments are proportional to the amount of credit in relation to the current bet. The chance of winning a spin is determined by this ratio.

General Information

Game Recovery

In the event of an unexpected interruption/termination of a real play game, the game will recover to the last known state.

Any game in progress for more than 35 days will be cancelled, and the corresponding bet will be refunded.

Payback Information

Your odds of getting any particular outcome are always the same. This reflects the theoretical return across a very large number of plays, over an extended period of time.

Any combination of wins in a single game is limited and will not exceed \$250,000.00. It may not be possible to reach this limit in a single game from every stake configuration.

The prizes are paid in accordance with the payout table available on the game interface.

This game has been independently fairness tested.

The expected payback for the main game is 96.5%.

Malfunction voids all pays and plays.
