

## Lucky Streaks

The average return to player for this game is 95.00%

Lucky Streaks is a 10 game classic themed multislot.

Adjusting the Stake will change the stake per game. Total Stake = Stake value x 10.

You can determine your prize by multiplying your stake by the corresponding multiplier shown on the paytable.

You win by matching three of the same symbols on any one game. You can win up to ten prizes.

Lucky Streaks 'Jackpot' mode can pay up to 10 potential payouts of up to x1000.

In Normal play each consecutive win will light up a letter in the word 'STREAKS', getting all 7 letters will turn the game into 'Jackpot' mode.

In 'Jackpot' mode each spin will remove a light from the word 'STREAKS'.

In Normal play the Background is Red, in Jackpot Mode the Background is Purple.

You can win more spins in 'Jackpot' mode by matching 3 'Rainbows' on any one game. Doing so will reset your 'STREAKS' back to 7.

Please note that 'Jackpot' mode does not count as free spins, your stake is deducted for each spin.

The probability of symbols common to the jackpot and normal modes are not consistent.

The prizes are paid in accordance with the payout table available on the game interface.

Any game in progress for more than 23 hours will be completed and the corresponding prize, if any, will be deposited into the account. In the case of a bonus round, only the total winnings from games completed by the player at that time will be deposited into the account.

Malfunction voids all pays and plays.

For information on prize payouts please view the paytable by clicking on the  icon, on the main game screen.

Pressing the  icon will bet your stake on all ten games.

Clicking on the  and  next to the stake will increase or decrease the bet amount.

The  icon opens up the help file.
