## HOW TO PLAY

Select your bet by pressing the green “up” and red “down” arrows.

To play a game, select your bet and click the Spin button to start.

## HOW DO I WIN?

To win you must match 3 or more symbols on an active payline, and symbols must be on adjacent reels (left-to-right, right-to-left and the middle three reels).

Giant BAR and X symbols may appear wholly or partially in view; these substitute for the corresponding regular size symbol.

Scatter wins and bonus wins are added to payline wins.

Only the highest win is paid on each pay line, and coinciding wins on different pay lines are added.

The prizes are paid in accordance with the payout table available on the game interface.

## MINI-SLOT FREE SPINS BONUS & PROGRESSIVE JACKPOT

Above each reel is a progressive jackpot display, which is won via the mini-slot free spins bonus. The progressive jackpots are only available in real play and consists of a fixed minimum amount that increases when a player makes a bet in the game. When the jackpot is won, it resets to the initial seed value and begins to rise again.

When a mini-slot symbol is in view on a reel, it will trigger a spin of the three reels displayed on it. The winning symbol combinations can be viewed by clicking the Paytable button in the game.

If three pot symbols are shown together on the mini-slot pay line during free spins, the corresponding progressive jackpot will be paid.

It is not possible for two players to simultaneously win the jackpot. The jackpot is locked when it is being won. This means that no other bets will be accepted for it and only one player at a time is able to win it.

For details on how apparent simultaneous or multiple progressive jackpot wins will be handled, how communication limitations affect you and how it may will be discontinued or terminated, please refer to the website's T&Cs.

## PICK A COIN BONUS

If four or five coin symbols are shown scattered in view, the Pick A Coin Bonus is triggered.
