• The wins in the current symbol drop are collected and then all symbols included in a winning combination explode and disappear. The remaining symbols fall vertically, slide to the left and then right repeatedly until they reach a resting position. The new result is paid out accordingly and the avalanche cycle continues as long as new winning combinations appear.

• When avalanche cycle ends, new symbols drop from above. This next symbol drop will add one additional row of symbols at the top, resulting in an increased number of ways to win.

• The numbers of ways to win increase as the number of rows increase.
4 rows: 4,096 ways to win
5 rows: 15,625 ways to win
6 rows: 46,656 ways to win
7 rows: 117,649 ways to win
8 rows: 262,144 ways to win

• The current active multiplier increases by a factor of two for every new multiplier scatter symbol ("X") that reaches the bottom row. It starts at x1 and continues up to a maximum of x64.

• The multiplier is reset before the start of the next game round.

• A bonus symbol (scatter) that reaches the first column triggers Bonus mode with free drops. 7 Free drops with 8 rows are awarded.

• A bonus symbol that reaches the first column during Bonus mode retrigger Bonus mode.

• The free drops bonus game always starts with the active multiplier set to x1.

• Every new free drop starts at 8 rows and with the current active multiplier. An achieved multiplier never decreases during an ongoing free drops bonus game.

• If the bonus symbol ends up in a dead zone where it is theoretically impossible for it to reach the first column, it explodes and is replaced by a new bonus symbol in the next symbol drop.

• In the bonus game all multiplier symbols fall vertically, slide left and then right and become sticky at the end of a free drop and they remain sticky for the remaining free drops.

• The free drops bonus game ends when no free drops remain or when the win cap has been reached.

• Winnings are paid out at the end of the bonus game.

• No bets can be changed during an ongoing symbol drop or in Bonus mode.
