

Candy Bars

If you've got a sweet tooth for delicious wins, nothing will satisfy you like **Candy Bars**.

Lollipops, peppermints, gumdrops, and candy 7s pay left to right and right to left. Fill every reel with any of these delectable treats and earn extra sweet *Blackout* wins. On top of all that, load reels with scrumptious chocolate to win progressive jackpots.

Gumballs in line wins are Wild and double the line win pays. Two Wild Gumball symbols quadruple the line win pays!

What could be sweeter than that?

Rules

Misuse or malfunction voids all pays and plays.

Line wins pay left to right or right to left. All line win symbols must appear on a played line and on consecutive reels, beginning with either the far left or the far right reel.

Only the highest winner is paid on each payline. Line wins and *Blackout* wins are multiplied by the coin value. Coinciding line wins on different paylines are added. Line wins are paid in addition to *Blackout* wins.

Wild symbols substitute for all other symbols and multiply line wins by 2. Two Wild symbols in a line win multiply that win by 4. Wild symbols appear on reels 2 and 3 only and do not substitute in *Blackout* wins.

Wins are shown in currency.

In some jurisdictions, regardless of bet size, there is an award cap on any single transaction. See the payable for details.

Additional Information

Expected Payback

In accordance with fair gaming practices required in most legal jurisdictions worldwide, each and every game outcome is completely independent. The odds of getting any particular outcome are always the same.

The odds do not vary based on prior outcomes, bet size, balance size, time of day, day of week, etc. For example, if the top award is won on a given spin of the game, the chances of winning the top award on the next spin are exactly the same. Likewise, prior losses do not change future odds.

The expected payback reflects the theoretical return across a very large number of spins by

numerous players over an extended period of time. The results for any given player over a play session can vary widely from this long-term, expected average in either direction. The fewer the number of games played, the wider the normal variance of actual payback that may be experienced.
