

## Game Rules

The objective in **Roulette** is to predict the number on which the ball will land by placing one or more bets that cover that particular number. The wheel in European Roulette includes the numbers 1-36 plus a single 0 (zero).

The 12 numbered Roulette wheels spin almost constantly. The balls are dropping one after the other in the different wheels after a short pause following the drop of the ball into the previous wheel.

The objective in Roulette is to predict the number on which the ball will land by placing one or more bets that cover that particular number. Each wheel includes the numbers 1–36 plus a single 0 (zero).

The highlighted wheels represent those wheels that are closest to the ball drop. There can be 2 to 3 wheels lit up at the same time. After you have placed bets, simply click/tap the PLAY NOW button to start the game round. The wheel closest to the next drop of the ball is then automatically selected as the wheel on which you are betting for this game round. Once the bets are accepted, you will be zoomed into the selected wheel.

The ball will eventually come to rest in one of the numbered pockets within that wheel. You win if you have placed a bet that covers that particular number.

After your game round is over, place new bets or simply click/tap the REBET button to repeat your bets and play again!

## Bet Types

You can place many kinds of bets on the Roulette table. Bets can cover a single number or a certain range of numbers, and each type of bet has its own payout rate.

Bets made on the numbered spaces on the betting area, or on the lines between them, are called Inside Bets, while bets made on the special boxes below and to the side of the main grid of numbers are called Outside Bets.

## INSIDE BETS:

- **Straight Up** - place your chip directly on any single number (including zero).
- **Split Bet** - place your chip on the line between any two numbers, either on the vertical or horizontal.

- **Corner Bet** - place your chip at the corner (central intersection) where four numbers meet. All four numbers are covered.

## OUTSIDE BETS:

- **Red/Black** - place your chip in the Red or Black box to cover the 18 red or 18 black numbers. The zero is not covered by these bets.

## More Games

The LOBBY button (if applicable) can be selected at any time from any game.

## Multi-Game Play

If you enjoy non-stop action, you can join up to four different game tables simultaneously and view them all in the same browser window!

After you have joined at least one game table, click on LOBBY. In the lobby or game, click the +TABLE button associated with that table to join it. (Certain tables may be unavailable for multi-game play and will therefore not display a +TABLE button.)

After you have joined multiple tables, you will be able to resize your browser window as a whole, but you will not be able to resize each game table window separately.

You can exit any table without affecting your presence at other tables you have joined. To exit a table, click the X button.

Please note:

- You will exit a table automatically if you join the same table through a different device/browser.
- If you click directly on a table icon instead of the +TABLE button, you will merely *switch* tables instead of joining the chosen table *in addition* to the table you joined previously.

We kindly advise you to join only as many tables as your screen can accommodate while still allowing you to place bets deliberately and accurately.
