

## WIN LINES

All games are played with 50 win lines.  
Wins can occur across any or all of the win lines.  
Only the highest award is paid per winning combination.  
All wins pay left to right across adjacent reels, except Bonus, starting from the leftmost reel.  
Wins on different played lines are added.

## WILD SYMBOL

Substitutes for all symbols except Bonus Scatter.  
Appears on all reels in the base game.

## WHEEL BONUS INFORMATION

100  
X

Landing 3 or more bonus scatters in view triggers the Wheel Bonus.

A pick me will then be presented and each scatter that landed transforms into a pick option.

Behind each pick option is a multiplier. This value will become the threshold at which the Wheel Bonus will exit. The values the windows can contain are 20X, 25X, 30X, 50X and 100X.

The probability of each different win multiplier being awarded in the bonus feature is not necessarily proportionate to the number of options on offer.

Once a value has been selected, Wheel Bonus will begin. The bonus will continue until a win which is greater than or equal to the value picked is achieved in a single spin of the wheel.

## WHEEL BONUS INFORMATION

The bonus begins on the first wheel. A spin of the wheel will award a multiplier value or an arrow.

A spin resulting in an arrow moves play to the next wheel.

A spin resulting in a multiplier adds this value to the total win meter. After being awarded, the value will transform to an arrow, except on the third and final wheel, where it may transform to a new, higher value instead.

The potential multipliers that can be won from the wheels are:

2X, 4X, 5X, 6X, 8X, 10X, 12X, 15X, 16X, 18X, 20X, 22X, 25X, 30X, 35X, 40X, 50X, 75X, 100X, 125X, 150X, 250X, 300X, 500X

Some positions on the wheel represent mystery win values. A multiplier value between 4X and 2000X will be awarded.

The probability of each different wheel outcome being awarded is not necessarily proportionate to the number of options shown on the wheels.

## SPIN CHANCE

Spin Chance is triggered automatically if the credit is reduced below the current price of play, yet is still greater than zero.

Spin Chance offers the player an opportunity to wager their remaining credit in an attempt at winning an additional spin at the current bet.

To play Spin Chance, select the 'PLAY' button to begin moving the pointer across the meter. Alternatively, select the 'NO THANKS' button to exit Spin Chance with the remaining credit.

If the pointer stops on the green segment, a spin at the current bet is awarded and plays automatically. If the pointer stops on the red segment, the player loses any remaining credit and exits to the base game.

The red and green segments are proportional to the amount of credit in relation to the current bet. The chance of winning a spin is determined by this ratio.
