

## Game Objective

Dream Catcher allows you to play the Money Wheel game of chance that is played using a large vertical wheel, spun by the dealer. Money Wheel game is found in many land-based casinos and used in TV game shows.

The wheel is divided into 54 equal segments separated by pins. 52 segments are marked with a number (1, 2, 5, 10, 20 or 40) with a unique colour for each number. If the wheel stops at your chosen number after the spin, you win. The other two segments – 2x multiplier and 7x multiplier – act as bonus spins and multiply your next win!

## Game Rules

Simply place a bet on a number you believe the wheel will stop at: 1, 2, 5, 10, 20 or 40.

The dealer then spins the wheel. When it comes to a stop, the winning segment is indicated by the flapper at the top of the wheel. If the wheel stops with the flapper in between two segments, the winning segment will be the segment that the flapper was passing, considering the wheel direction.

All bets are paid on a to one basis with the odds matching the number in the winning segment: e.g. winning number 5 pays 5 to 1, winning number 10 pays 10 to 1, and so on.

If the wheel stops on a multiplier segment (2x or 7x), then all bets remain in place and no new bets will be allowed. The wheel is spun again and the outcome of the spin (1, 2, 5, 10, 20 or 40) will determine the winning odds as usual but the odds will be multiplied twice or seven times over, depending on which multiplier the wheel stopped on in the previous spin.

If the wheel stops on a multiplier two or more times in a row, then all bets remain in place, and the multipliers stack: i.e. the multiplied payout from the last spin is multiplied again! The dealer continues to spin the wheel until the spin stops on 1, 2, 5, 10, 20 or 40. (For example, the wheel stops on 2x, then on the next spin it stops on 7x, and on the next spin –

on number 5. The outcome for the player who originally placed a bet on number 5, is:  $(5 \text{ to } 1) \times 2 \times 7 = (10 \text{ to } 1) \times 7 = 70 \text{ to } 1$ .

Consecutive multipliers are unlimited subject to a default maximum win displayed in the limits panel.

## Payouts

Number on Wheel	Number of Segments	Pays
1	23	1 to 1
2	15	2 to 1
5	7	5 to 1
10	4	10 to 1
20	2	20 to 1
40	1	40 to 1
2x	1	Multiplies the payout of the next winning number by 2x
7x	1	Multiplies the payout of the next winning number by 7x

Maximum payout for your all winnings within a game round is limited. For details see the Bet Limit table.

Please note that any malfunction voids the game round and all eventual payouts for the round.

€ 100,000

The TRAFFIC LIGHTS tell you the current status in the game round by informing you of when you can bet (GREEN light), when the betting time is nearly over (YELLOW light), and when betting time has expired (RED light).

PLACE YOUR BETS

The CHIP DISPLAY allows you to select the value of each chip you wish to bet. Only chips of denominations that can be covered by your current balance will be enabled.

Once you have selected a chip, place your bet by simply clicking/tapping the appropriate betting spot in front of the wheel. Each time you click/tap the betting spot, the amount of your bet increases by the value of the selected chip or up to the maximum limit for the type of bet you have selected. Once you have bet the maximum limit, no additional funds will be accepted for that bet, and a message will appear above your bet to notify you that you have bet the maximum.

NOTE: Please do not minimise your browser or open any other tab in your browser while betting time remains and you have placed bets on the table. Such actions may be interpreted as leaving the game, and your bets will therefore be declined for that particular game round.

You can also click/tap the BET ON ALL button which allows you to place a bet on all bet spots. The value of your selected chip will be placed on all bet spots simultaneously.

The REPEAT button allows you to repeat all bets from the previous game round. This button is available only before the first chip is placed.

The DOUBLE (2x) button becomes available after you have placed any bet. Each click/tap doubles all your bets up to the maximum limit. Note that you must have a sufficient account balance to double ALL your placed bets.

The UNDO button removes the last bet you placed.

You can click/tap the UNDO button repeatedly to remove bets, one by one, in the reverse order of which they were placed. You can clear all your bets by holding the UNDO button.

The TOTAL BET indicator displays the total amount of all bets placed in the current round.

## Autoplay

Once you have placed a bet, Autoplay allows you to repeat your selected bet or bets for a chosen number of game rounds.

To start Autoplay, place your bets on the betting grid as usual and then click/tap the Autoplay button.

The Autoplay panel will then open, and from here you simply select the number of game rounds you would like your bet to be repeated in. Then click/tap START to Autoplay.

Your selected number of Autoplay rounds will be displayed in an indicator on the Autoplay button. The number of remaining Autoplay rounds will be updated, once Autoplay is started.

Your total Autoplay limit can be calculated by multiplying the number of your selected Autoplay rounds with the value of your total bet. Your remaining Autoplay limit can be calculated by multiplying the number of remaining Autoplay rounds with the value of your total bet per one round.

Your automatic game rounds will continue until either your chosen number of Autoplay rounds is complete, or you choose to stop Autoplay.

You can end Autoplay at any time by simply stopping Autoplay.

Placing additional bets on the betting grid or doubling your bets while Autoplay is running will also stop Autoplay.

## Error Handling

If there is any error in the game, system or game procedure, the game round will be temporarily paused while the dealer notifies the shift manager. You and other players will be notified via Chat, or by an on-screen pop-up message, that the issue is being investigated. If the manager can immediately resolve the error, the game round will continue as normal. If immediate resolution is not possible, the game round will be cancelled and initial bets will be refunded to all players who participated in the game round.

## More Games

The LOBBY button (if applicable) can be selected at any time from any game.

It allows you to easily change game table or select any other live game. You will not be removed from this game until you have actually selected the new game/table you wish to join. You can use the LOBBY to browse other games while still playing in your current game.

## Multi-Game Play

If you enjoy non-stop action, you can join up to four different game tables simultaneously and view them all in the same browser window!

After you have joined at least one game table, click on LOBBY. In the lobby or game, click the +TABLE button associated with that table to join it. (Certain tables may be unavailable for multi-game play and will therefore not display a +TABLE button.)

After you have joined multiple tables, you will be able to resize your browser window as a whole, but you will not be able to resize each game table window separately.

You can exit any table without affecting your presence at other tables you have joined. To exit a table, click the X button.

Please note:

- You will exit a table automatically if you join the same table through a different device/browser.
- If you click directly on a table icon instead of the +TABLE button, you will merely *switch* tables instead of joining the chosen table *in addition* to the table you joined previously.

We kindly advise you to join only as many tables as your screen can accommodate while still allowing you to place bets deliberately and accurately.
