GAME RULES

About Slot Games

This is a game of chance, with fixed odds, where the payer can bet a certain amount of money or credits to try to get combinations of symbols that grant payments.

The game presents a number of reels or columns, each with a set of symbols that, on each play, stop at a random position, defining which symbols are visible on the screen. Each game has different symbols, both in quantity and appearance, according to its theme and design.

Basic Info

Usually placed in the upper or lower side of the game, the player can find the session info which can include:

- Balance / Credit: The money or credits the player has in his casino account, available to wager.
- Bet / Total Bet: The value set as the current bet.
- Total Win: The value earned on the last play.
- Play ID: A unique number that identifies each game round. When a new game round starts, this number is updated and remains on screen until the next game round.

Payouts

A specified number of like symbols appearing in a selected payline results in a payout. The number of each symbol required, its payout and the paylines patterns available in this game are explained in the Help/Paytable of the game itself.

Bet Settings

Games allow player to choose the amount of coins, credits or money to wager. The player can modify the bet using the controls in the bet section (BET/LINE BET / TOTAL BET). In any case, the total wagered per spin is obtained by multiplying the number of coins selected (1 by default) by the coin value or line bet by the number of paylines selected. The bet level also defines the payouts level, according to the paytable.

Playing the game

After the paylines and the bet amount have been set, the player has to put the reels in motion by clicking or tapping the SPIN / START button, usually located at the center or right of the screen. Clicking or tapping this button will start the reel spinning animation, and generate a debit in the player's balance. Once the reels stop, the prizes (if any) will be added to the balance.

Autoplay

The player can use AUTOPLAY controls, to set a number of spins. This function will start each spin automatically until either something that requires the player's intervention occurs or the number of spins expires.

For some jurisdictions, the autoplay options will include extra settings that allow for an autoplay interruption if the local amount won or lost in that session exceeds a specified amount or if any single win exceeds a specified amount.

Other Controls

The player is generally able to toggle on/off sound, speed, quality or graphics and other settings, using the controls available on the interface of the game. There is also a LOBBY / HOME / CLOSE button that allows player to quit the game and go back to the Casino's lobby where you can find the game catalogue.

Special Symbols

In addition to regular symbols, the game may have one or more of the following special symbols:

- Wild: it can substitute most other symbols in order to complete a winning combination.
- Scatter: This symbol need not necessarily appear in defined paylines. The specified number of scatter symbols can appear anywhere on the reels. Scatter symbols can also be used to trigger bonus rounds.
- Bonus: When appearing on screen in the specified number and / or location, this symbol triggers a bonus round.
