FREE SPINS INFORMATION

Landing 3 or more bonus scatters in view triggers the Free Spins bonus.

A pick me feature will then be presented, each scatter that landed transforms into a pick option.

Behind each pick is a multiplier. This value will become the threshold at which the Free Spins will exit. The values the windows can contain are 20x, 25x, 30x, 50x and 100x. The probability of each different win multiplier being awarded in the bonus feature is not necessarily proportionate to the number of options on offer.

Once a value has been selected Free Spins will begin. The Free Spins will continue until a win which is greater than or equal to the value picked is achieved.

During Free Spins any wild symbol that lands in view will lock in place and remain in that position until Free Spins have ended.

SPIN CHANCE

Spin Chance is triggered automatically if the credit is reduced below the current price of play, yet is still greater than zero.

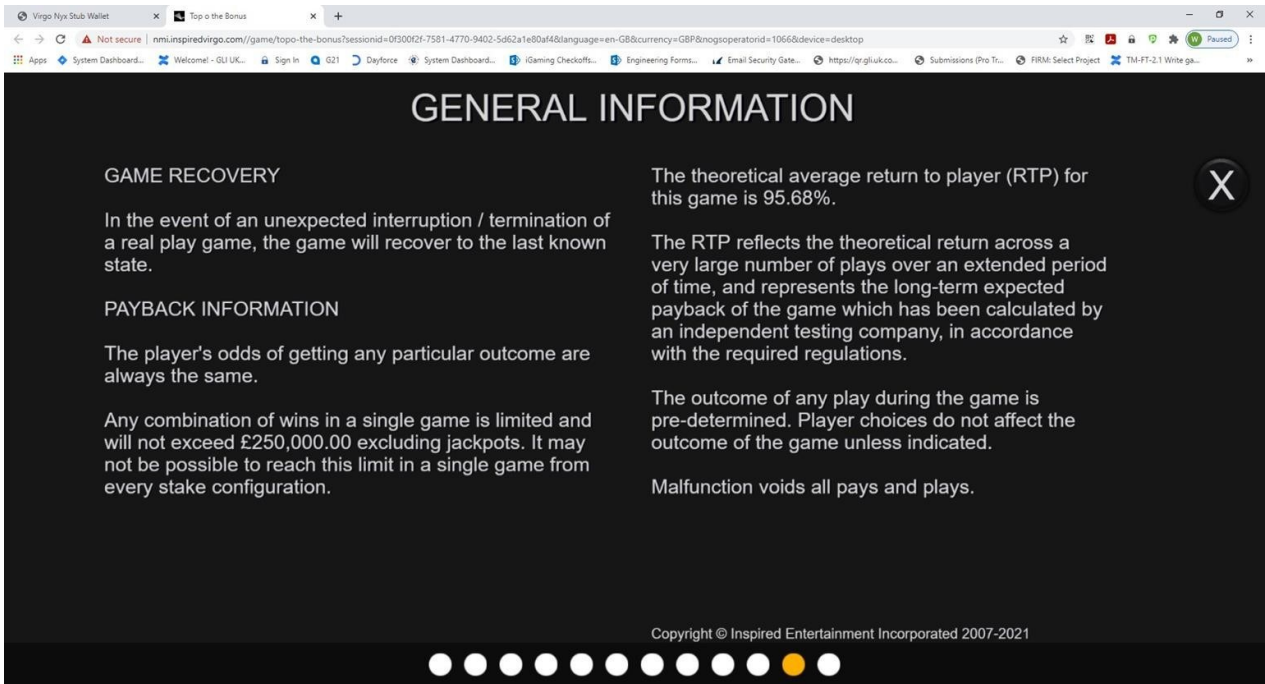

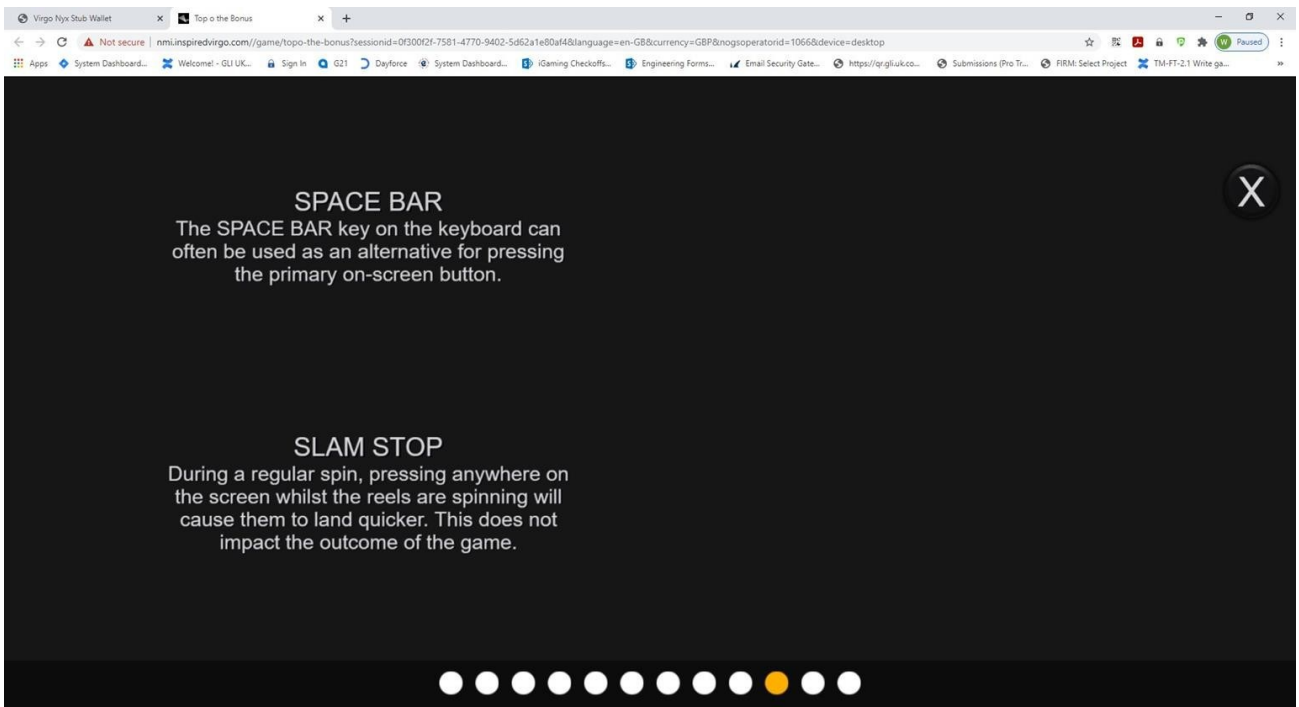

Spin Chance offers the player an opportunity to wager their remaining credit in an attempt at winning an additional spin at the current bet.

To play Spin Chance, select the 'PLAY' button to begin moving the pointer across the meter. Alternatively, select the 'NO THANKS' button to exit Spin Chance with the remaining credit.

If the pointer stops on the green segment, a spin at the current bet is awarded and plays automatically. If the pointer stops on the red segment, the player loses any remaining credit and exits to the base game.

The red and green segments are proportional to the amount of credit in relation to the current bet. The chance of winning a spin is determined by this ratio.

The prizes are paid in accordance with the payout table available on the game interface.
