Getting started

- When you start the game, you enter a lobby where you can choose a machine to play this game. Simply click on "Play now" or a vacant machine to begin playing!
- This game is a game for one player - the gameplay of other players does not affect yours. Each game starts when you place a bet and ends when you leave the application.
- In the lobby, you may see other players in the same game sitting at a machine. By clicking such a machine, you are entering "spectator mode" and can watch a different player play. You are not able to influence the game which you are spectating in any way.

Playing

- You choose the total bet per round via the "Total Bet" button.
- The minimum bet per round is \$0.20.
- The maximum bet per round is \$40.00.
- The "Start" button begins a round of play.
- Each round is independent of previous rounds.
- All game outcomes are independent and randomly determined.
- When you start a round, the bet is deducted from the balance you've paid in.
- At the end of a round, the console displays your win, if any.

Win Ways

- Little Cluckers™ has 5 reels and 243 winning ways.
- Symbols pay from left to right and must be consecutive.

Autoplay

- Clicking on "Auto" starts automatic spins.
- If "Autoplay" is activated the button label becomes green. Clicking it again stops the automatic spins.
- Autoplay stops automatically when the total bet is higher than your current funds.
- Autoplay stops automatically when a feature is awarded.

Winnings

- Winning combinations and payouts are made according to the paytable.
- Symbol payout values shown in the paytable are dynamic and change in accordance with the selected bet value.
- Wild symbols may appear on reels 2 and 4.
- The Wild symbol substitutes for all symbols except for scatter symbols to help complete winning combinations.
- The leftmost reel is reel 1, the rightmost reel is reel 5.
- All wins start on the leftmost reel and are for combination of a kind on ways, consecutive left to right, except scatters.
- Highest win only paid per way and per scatter combination.
- Scatter wins and way wins are added.
- Scatter symbols pay at any position on screen.

RTP Range

- The theoretical RTP (return to player) value for this game is 95.07%.
- The theoretical RTP is calculated as total win/total bet over a large number of games played and reflects the prizes awarded by a game as a percentage of all bets made. The actual RTP can vary widely in either direction for a small number of games due to statistical variance.

Connection Loss

- In case you lose your network connection, the game will proceed to complete the current round of play automatically after a delay of 2 hours absence from the game.
- If you reconnect into the game earlier, you are able to continue playing the current round.
- If this round contains multiple spins (e.g. free games feature), the game will determine your winnings based on the game's expected win values.

Malfunction voids all pays and plays.
