

Lucky Stars Keno

Introduction

LUCKY STARS KENO is a single player Keno with 80 numbers to choose from and 20 numbers randomly drawn at every round. You may select between 2 to 10 numbers. From the 20 numbers drawn, there are 3 numbers designated as the “Lucky Stars” numbers.

How to Bet

Choose between 2 to 10 numbers in the 80 numbers grid. Press on a desired number on the grid to select it. The color of the number on the grid will change to a different color to show that the number has been selected. To unselect a number, press on a selected number. You may also press and drag to select multiples numbers.

Stakes

Display the current stake amount for the round.

Press the minus button (-) to decrease the stake amount for the next round.

Press the plus button (+) to increase the stake amount for the next round.

Clear All

Clear all selected numbers from the grid.

Clear Last

Clear last selected number from the grid.

Lucky Dip

Randomly select numbers from the grid. The number in the Lucky Dip field indicates the selection of the numbers (from 2 to 10).

Press the minus button (-) to decrease the selection of the numbers.

Press the plus button (+) to increase the selection of the numbers.

Previous selection

Allows to cycle through the previous played numbers selection.

Press the back arrow to go back to the previous played numbers selection.

Press the forward arrow to go to the next played numbers selection.

Speed

Press to change the speed of the drawn numbers from slow/normal/fast.

Play

Press to start the game.

Press to access the options menu.

Select the speed of the drawn numbers from slow, normal or fast.

Enable or disable auto play.

Enable or disable sounds or background music.

Display game's rules.

Drawing Numbers

Once the numbers have been selected, press on Play to start the game. The game will randomly draw 20 numbers out of the 80 numbers.

When the drawn number lands on a number on the grid that has not been selected, the number on the grid will change to a distinct color. If the drawn number lands on a selected number, the number will change to a different color than previously.

Lucky Stars Numbers

There are 3 «Lucky Stars» numbers that will be drawn during each game. If any of the Lucky Stars numbers match the selected numbers, all winnings will be multiplied by the Lucky Stars multiplier. If more than one Lucky Star match the selected numbers, the relevant multipliers will stack.

- 1st is a Blue Lucky Star and it is always the first ball drawn and offer a 2X multiplier.
- 2nd is a White Lucky Star and it is always the 10th ball drawn and offer a 2X multiplier.
- 3rd is a Red Lucky Star and it is always the 20th ball drawn and offer a 4X multiplier.

How to Win

Winning are paid accordingly to the paytable and depends on how many numbers you have selected and how many numbers matched. Winning payout is indicated in the paytable and will adjust accordingly based on the numbers selection and the stake amount.

The prizes are paid in accordance with the payout table available on the game interface.

Paytable

8 on 10	X100	1 in 7 385
9 on 10	X550	1 in 163 382
10 on 10	X5000	1 in 8 911 712

Return to Player

The odds of getting a particular outcome are always the same at the start of every game. The odds do not vary based on prior outcomes, bet size, balance size, numbers picked, time of day, day of the week, etc. For example, if the top award is won on a given play of the game, the chances of winning the top award on the next play are exactly the same. Likewise, prior losses do not change future odds.

The theoretical average return to player (RTP) is between 92.41% and 96.03% depending on how many numbers are picked. This RTP represents the long- term expected payback of the game which has been calculated by an independent testing company. Malfunction Voids all pays and plays.

Any game in progress for more than 35 days will be cancelled, and the corresponding bet will be refunded.
