

HELP

SPECIAL SYMBOLS AND FEATURES

PRIZE LADDER AND SYMBOLS

This game features only one reel on which it's possible for 3 types of symbol to land – the Green Crystal, Red Crystal and Golden Shield. The game also features a 20-step, ladder-style payable. The aim of the game is to climb as high as possible up the payable by collecting Green Crystals.

GREEN CRYSTAL

Each Green Crystal that lands will allow you to climb one step up the payable ladder. You can choose to Continue, Take Half or Collect after a Green Crystal has landed.

Continue – stay in the game and continue to play with 100% of your potential winnings.

Take Half – cash out 50% of your potential winnings and continue to play the game round with the remaining 50%. Halving is only available if your currently accumulated win amount is equal or above 1.0 of the currency in which you are playing.

Collect – cash out all of your winnings and end the current game round.

The more Green Crystals that land, the greater your chances of landing a Red Crystal.

The chances of landing either a Green Crystal or a Red Crystal are shown as percentages above the reel. The displayed chance for a Green Crystal also applies for a Golden Shield. The percentages are rounded to 1 decimal place.

RED CRYSTAL

If you don't have an active Golden Shield when a Red Crystal lands, the current game round ends, you lose all your stacked win amount that has not been cashed out and you start from the bottom of the prize ladder.

If you have a Golden Shield active, landing a Red Crystal will break the shield and increase the next prizes on the ladder. You can then again choose to Continue, Take Half or Collect from the level reached.

GOLDEN SHIELD

Landing the Golden Shield will activate a shield to protect you from a Red Crystal. The Golden Shield will start automatic spins, where no decisions will be made after Green Crystals land as you have protection and cannot lose the prize. After the Golden Shield is broken by landing a Red Crystal, the automatic spins stop and you can again choose how to proceed.

PRIZE LADDER LEVELS AND PRIZES

The prizes on the ladder represent stake multipliers. Landing a Red Crystal the first time after an activation of a Golden Shield during a game round upgrades you to Advanced multipliers and these increases are applied to all yet to be achieved levels on the ladder. The levels on the ladder and their corresponding prizes on the payable are:

Level 1 – 1.16x; Advanced – 1.16x
Level 2 – 1.54x; Advanced – 1.62x
Level 3 – 1.92x; Advanced – 2.12x
Level 4 – 2.6x; Advanced – 2.98x
Level 5 – 3.46x; Advanced – 3.84x
Level 6 – 4.8x; Advanced – 5.38x
Level 7 – 6.82x; Advanced – 7.68x
Level 8 – 9.6x; Advanced – 10.08x
Level 9 – 14.44x; Advanced – 15.36x
Level 10 – 20.64x; Advanced – 23.04x
Level 11 – 31.68x; Advanced – 34.56x
Level 12 – 51.84x; Advanced – 59.52x
Level 13 – 91x; Advanced – 101x
Level 14 – 154x; Advanced – 168x
Level 15 – 298x; Advanced – 346x
Level 16 – 528x; Advanced – 730x
Level 17 – 1,152x; Advanced – 1,440x
Level 18 – 2,704x; Advanced – 3,840x
Level 19 – 6,528x; Advanced – 10,560x
Level 20 – 18,000x; Advanced – 48,000x

Some values might be rounded up to the second decimal place in case a result based on the current stake would yield a value with 3 or more decimal places.

BEST GAMBLE STRATEGY

In order to define the Best Gamble Strategy for this game we need to break a game round into 3 possible scenarios:

1. You have not landed a Golden Shield:

If you have not landed a Golden Shield, the best strategy is to cash out after landing 9 Green Crystals.

2. You have already landed a Golden Shield and it has just been broken:

Choosing whether to Collect or Continue immediately after the deactivation of a Golden Shield depends on how many Green Crystals are left in play which is indicated above the reel:

19 Green Crystals - Continue.
18 Green Crystals - Collect.
17 Green Crystals - Continue.
16 Green Crystals - Continue.
15 Green Crystals - Continue.
14 Green Crystals - Continue.
13 Green Crystals - Collect.
12 Green Crystals - Continue.
11 Green Crystals - Collect.
10 Green Crystals - Collect.
9 Green Crystals - Continue.
8 Green Crystals - Continue.
7 Green Crystals - Collect.
6 Green Crystals - Continue.
5 Green Crystals - Continue.
4 Green Crystals - Collect.
3 Green Crystals - Collect.
2 Green Crystals - Collect.
1 Green Crystal - Collect

3. You have landed the Golden Shield and after it was broken you have chosen to Continue and have landed a Green Crystal:

The best strategy requires to Collect after a maximum of one Continue choice that has resulted in a Green Crystal after breaking the Golden Shield.

BONUS AUTO-COMPLETE

If the player loses connection to the game, closes the game or restarts the game before making a choice, the current game round will auto-complete by following the Best Gamble Strategy as described above.

HOW TO PLAY ASTRONAUT

GAME PROGRESS

Any progress features in the game, including symbols locked onto the reels which affect subsequent spins, are saved for your game at the stake level you are playing at.

You can have different progress levels at different stakes on the same game, and move between them by changing the stake.

If you are awarded free spins from a promotional campaign any progress in the main game including any locked symbols, will be saved and be available to continue playing at the same stake once the free spins have been completed.

Please note that this stateful game saves its state forever.

Total Stake

The Total Stake is the total of stakes per line. You can adjust it at any time, using the + or – buttons.

Spin the Reels

If you are playing on desktop, click the Spin button or press the spacebar to spin.

Speed up each reel spin by pressing spacebar again, or by clicking on the reels. For TURBO SPIN, hold down the spacebar or the Spin button.

General types of games

Check the pays menu in the game payable if you are not sure of the game type.

The values related to each symbol, shown either on the slot scene or on the dedicated Symbol Wins pages of the Pays menu, represent stake multipliers and not credits.

If you are playing a Lines game, the prize value from one payline is equal to the total stake divided by the number of paylines, multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple win lines, the total win values are summed. If more than one win occurs on the same payline, the largest win is paid. Each individual payline can pay only once per spin.

Example: Total stake is 2. Total paylines are 20. Symbol multiplier for length of 5 is 300. The win for 1 payline with this symbol and length would be calculated as such: $2 / 20 * 300 = 30$.

If you are playing a Ways, a MegaWays or a Cluster game, the prize value from one way or cluster in a Ways or Winning Clusters game is equal to the stake multiplied by the symbol multiplier advertised in the payable. Where multiple wins occur on multiple ways or clusters, the total win values are summed.

Example: Total stake = 2. Symbol win multiplier = 2. Win = $2 * 2 = 4$.

If there is a Scatter Symbol in the game, all wins will be paid in addition to any other symbol wins occurring on the same spin.

Please be aware that each account allows only a single game to be played at any one time. Therefore, a game should not be played on more than one device, or multiple games on the same device simultaneously. Doing so may lead to various errors.

For the best gaming experience, use of the latest version of software is recommended.

Malfunction voids all pays and plays.

RTP ~ 95.69%

Minimum stake: \$0.10

Maximum stake: \$10

Published RTP% is based on the best game strategy.

The prizes are paid in accordance with the payout table available on the game interface.

Any game in progress for more than 35 days will be cancelled, and the corresponding bet will be refunded.

WITH PROGRESSIVES

Jackpot Game

Win one of the offered jackpot tiers when three or more jackpot symbols appear on the reels or the jackpot is triggered by a game feature. Spin the jackpot wheel to determine which of the offered jackpot tiers will be won. The size of the segments on the jackpot wheel do not correlate to the odds of winning each jackpot tier represented. The chances of winning a jackpot increase in correlation with the size of the stake played. The jackpot is triggered randomly and can be won by playing any of the linked jackpot games. To win the jackpot, the player is not required to make any decision other than to spin the reels. The stake value cannot be changed during free spins. Internet connectivity issues may cause delays in jackpot messages or updates, but they do not affect actual jackpot wins. It is not possible for two players to win the same jackpot. In the event two jackpot winnings occur close to one another the jackpot will be assigned in their respective order. Due to connectivity issues the jackpot value displayed may differ from the effective jackpot value. The jackpot could be temporary deactivated, when this occurs all contributions are paused. The jackpot amount available upon reactivation will be the same as before the deactivation.

Progressive Jackpot

The progressive jackpot is accumulated by all stakes on games offering these jackpots and, in some cases, the jackpots may be offered on multiple websites. A percentage of each total bet is added to a common pot. Part of this contribution is used to form the progressively increasing jackpot amounts, and the other part, contributes to a seed fund, which is the minimum amount of money guaranteed to be made available to players after a jackpot is won by qualifying players. Once the jackpot has been won, a new progressive jackpot will be made available and the process repeats. The jackpot can be triggered and won by a single spin from a single user only. This jackpot does not have a ceiling value and can be won at any time. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

Time Jackpot

The time jackpot is a progressive jackpot which is guaranteed to pay out before a set date and time. The prize pot grows with the contributions from the stake of each spin on a jackpot game, and the closer the prize pot gets to the advertised guaranteed latest payout time, the greater the odds of winning it.

Odds increase up to 100% when the guaranteed latest payout time is reached. Once the jackpot has been won, a new time jackpot will be made available and the process repeats with a new deadline for the next guaranteed payout. The jackpot can be triggered and won by a single spin from a single user only. This jackpot does not have a ceiling but must be won before the date and time specified. When the jackpot is won by another player, a notification appears in the jackpot panel. Once won, the amount is transferred directly to the user wallet, even if it is won during a bonus spin.

Dynamic Jackpot Allocation

Only the first \$2 of a stake is eligible to win the time jackpot.

Stake amounts in excess of \$2 are contributed directly to the progressive jackpot.

Daily Drop (time)

Current starting value is: \$200, Next minimum starting value is: \$200

Super Drop (progressive)

Current starting value is: \$5,000.00, Next minimum starting value is: \$5,000.00

The RTP shown in the game help screens includes the 3% progressive jackpots contribution.
