Unfinished Games

If your game round is disrupted, all game information and placed bets are stored until you re-open the game. You may continue your unfinished round from the point of interruption. Unresolved bets placed but remaining undecided in incomplete games will become void after 30 days. Malfunction voids all pays and plays.

Any game in progress for more than 30 days will be cancelled, and the corresponding bet will be refunded. The prizes are paid in accordance with the payout table available on the game interface.

Information

Payline wins occur on the number of selected paylines, according to the information in the paytable and game rules. When winning on multiple paylines in a single game round, all winnings are added together. All winnings from Features (such as Free Spins), Bonus Games and/or Scatters (if applicable) are also added to payline wins. All winning combinations are paid out at the end of a game round. Free Spin features are played with the same bet and same number of selected lines as the game round that triggered the feature – unless otherwise stated. The bet cannot be changed during a currently running game round. Please refer to the game rules for more information. All wins pay left to right, beginning with the left-most reel. In FREE SPINS only: Special expanding symbols will pay for any winning combination with gaps allowed. The wins pay from left to right, beginning on any reels where a winning combination is possible.

Game Rules

Rich Wilde and the Book of Dead is a 5-Reel game. Up to 10 lines can be activated, lines are numbered and always activated in numerical order (1, 2, 3, 4, etc.).

The Scatter symbol acts as a Wild, and substitutes for all other symbols.

3 or more Scatter symbols trigger Free Spins. An Initial 10 free spins are awarded.

Before a free spin sequence begins, an ordinary symbol is randomly chosen to act as a special expanding symbol during the entire free-spin sequence. After prizes for regular winning combinations have been recognized, the special symbol may expand to cover all three positions on its reel. The special symbol will expand only when additional prizes can be awarded along active paylines for winning combinations. Expanded symbols do not need to appear adjacent to each other to result in a winning combination.

3 or more Scatter symbols re-trigger Free Spins. An additional 10 free spins are awarded.

The game also features an optional Gamble round that provides an opportunity to multiply the total prize on any spin in the main game by correctly guessing the colour of a face down card which has a winning probability of 50% (1 in 2 chance) to double your current win total. Or correctly guessing the suit of a face down card which has a winning probability of 25% (1 in 4 chance) to quadruple your current win total. You can play the Gamble bonus round up to five times in succession and up to a limit of 2500 coins. Gamble feature will not impact the overall RTP.

The average RTP is 96.21%. RTP is achieved through participation.

In the SETTINGS window, you can specify the number of lines you wish to activate per round, the number of coins you wish to bet per active line, and the coin denomination used. To start the round, click SPIN. When the reels stop, the symbols displayed determine your prize according to the paytable.
